英语

基础教程

第三册

ENGLISH

致同学

亲爱的同学们：

欢迎大家开启英语中级学习之旅！从现在起，这套教科书将伴你一路学习，见证你的成长。

本套教科书以问题为线索、以活动为载体，联结现实生活，彰显时代特色，融入丰富多元的文化内容。学习本套教材，有助于发展语言能力、培育文化意识、提升思维品质、增强学习能力，树立国际视野，涵养家国情怀，坚定文化自信，逐步形成正确的世界观、人生观与价值观。

本套教科书包含基础教程与提高教程两部分：基础教程共三册，对标 CEFR A2 等级与 CSE 3 级素养目标，达到初级中等学校毕业及高级中等学校招生选拔的基本要求；提高教程共一册，对标 CEFR B1 等级与 CSE 5 级素养目标，满足高级中等学校毕业及普通高等学校招生选拔的基本要求。

教科书结构方面：

基础教程以单元为基本组织模块，每册有 16 个单元，分为预备单元、复习单元和正式单元等三类。每个正式单元围绕一个单元主题，设置四个板块：A 板块（Dialogues & Passages）提供地道对话和优美短文，主题丰富、内容生动且富有时代性，帮助同学们学习英语语言知识，培养英语思维。B 板块（Key Structures）借助典型例句，讲解本单元重点语言知识。C 板块（Vocabulary & Phrases）列出本单元需要掌握的单词和短语：CSE 3 级核心词汇（1500 词）采用粗体字突出标识，要求认读、拼写、运用和辨析；CSE 5 级核心词汇（3500 词）采用正体字标识，要求认读、拼写；其余词汇为正体并在右上角加注星号（*），仅作认读要求。D 板块（Expanding Horizons）结合单元主题编排跨文化交流、跨学科学习、综合运用和写作等内容，为真实语境下的语言交际与应用奠定基础。

提高教程以课为基本组织模块，共 72 课，每课围绕特定语言知识设计课文（Passage）和词汇（Vocabulary）2 个模块，帮助学生深化对基础教程内容的理解，提升英语语言知识的综合运用能力。

英语作为一门自然语言，其魅力不仅体现在丰富的词汇与独特的语法体系，更蕴藏在语言持续使用、不断发展过程中承载的文化与历史。想要学好英语 —— 乃至任何一门自然语言，都需要掌握行之有效的学习方法，坚持多听、多说、多读、多写、多记、多用。

曾有一位游人在游览杭州西湖后写下一首打油诗：

昔年曾见此湖图，不信人间有此湖。

今日打从湖上过，画工还欠费功夫。

受限于教材篇幅与编者学识眼界，英语语言文学的博大精深，难以在这几册书中尽数展现。但这无妨，不妨坚持学下去。或许有一天，当你学有所成，回望这套教科书，会由衷感慨：“如今识得英语趣，编者还欠费工夫。” 书山有路勤为径，祝愿大家在英语学习的道路上收获新知，不断进步！

CONTENTS

UNIT	TOPIC
1 The Changing World p. 1~8	1. Talk about changes in one's hometown. 2. Talk about big changes in the last 10 years.
2 Inspiring People p. 9~16	1. Talk about inspiring people. 2. Discuss who you admire and why.
3 Smart Learning p. 17~24	1. Talk about how to learn better. 2. Discuss ways to improve active learning.
4 Our Memory p. 25~32	1. Talk about memory problems and solutions. 2. Talk about a happy memory of your family.
5 Power of Ideas p. 33~40	Talk about important inventions and great inventors.
6 Beyond Earth p. 41~48	1. News about space exploration. 2. Discuss reasons for space exploration.
7 Feel the Rhythm p. 49~56	1. Talk about a school concert. 2. Talk about music you like on different occasions.
8 More Than a Game p. 57~64	1. Talk about Sports Day. 2. Talk about Olympic sports events.
9 Let's Celebrate! p. 65~72	1. Talk about festivals. 2. Share festival experiences with others.
10 A Look into the Past p. 73~80	1. Talk about historical objects and sites. 2. Introduce historical objects and sites.
11 A Taste of Art p. 81~88	1. Talk about artworks. 2. Describe a piece of artwork.
12 Reduce, Reuse, Recycle p. 89~96	1. Talk about reports on pollution. 2. Talk about "Reduce, Reuse, Recycle" in everyday life.
13 I Remember Meeting All of You in Grade 7 p. 97~104	1. Talk about the most unforgettable person in junior high school. 2. Talk about the most unforgettable experience in junior high school.
14 Open to New Beginnings p. 104~114	1. Talk about future plans after graduation. 2. Deliver a speech about future plans.
Review 1 p. 115~122	
Review 2 p. 123~132	

GRAMMAR	EXTENSION
Simple Past Tense vs. Present Perfect Tense	Poems and proverbs about *growth and change*
Dummy Subjects and Delayed Subjects	Write letters of *Gratitude*, *Apology* & *Congratulation*
Objective Clauses with *that*	Reading: *How to Learn English Effectively*
Objective Clauses with *if*, *whether*	Reading: *The Ebbinghaus Forgetting Curve*
Objective Clauses with Question Words	Write a notice
Passive Voice in All Tenses	Reading: *Yuri Gagarin: The First Human in Space*
Active Form with Passive Meaning	Lyrics: *You and Me* + *L'Internationale*
Relative Clauses with *that*, *which*	Reading: *Living Legends of Sports*
Relative Clauses with *that*, *who*, *whom*	Reading: *How the World Celebrates Mid-Autumn Festival*
Relative Clauses with *where*, *when*, *why*, *whose*	Reading: *The Chinese Writing System: Connecting the Past and the Present*
Relative Clauses with *that* (only)	Paintings
Subject-Verb Agreement	Poems and proverbs about *environmental protection*
1. Elements of Sentences 2. Simple, Compound and Complex Sentences	Write a speech
Modal Verbs for Possibilities (*must*, *could*, *may* / *might*, *can't*)	Reading: *We Choose to Go to the Moon*
Tenses and Voices	
Clauses	

UNIT 1 The Changing World

A Dialogues & Passages

Conversation 1

Bob: I'm amazed by how green your hometown has become!

Grandpa: Have you seen the corn fields outside of the town yet?

Bob: Yeah! They're huge!

Grandpa: There used to be sandstorms all the time, and the fields were getting smaller and smaller. Then, after one big sandstorm, we decided to do something.

Bob: What did you do?

Grandpa: We found a small bush. It had long roots that could hold the soil together. We began planting it in sandy areas. The government provided support too.

Bob: Wasn't it difficult to plant so many bushes?

Grandpa: Yes, it was. In the beginning, we worked by hand. Later, we had machines to help. We have planted many bushes and trees since then. There are fewer sandstorms now and the environment is getting better. It has also improved our lives. Everyone has become richer and happier.

Conversation 2

Reporter: How has life changed in your hometown over the last 20 years?

Mr Yan: Oh, it has changed quite a lot! Many young people used to work in big cities. Now, more of them have come back to live and work here.

Reporter: Great! Have there been any other changes?

Ms Wu: Yes, we've changed the way we farm. I used to grow a few vegetables on a small farm to sell at the local market. Now, I have large, high-tech greenhouses. There, I grow tons of fruit and vegetables, and sell them in large cities.

LGPL Free as in Freedom

Reporter: Wow, the new highway and railway must have helped a lot!

Mr Yan: Oh, they have! Our village has become a tourist attraction. We can now sell local products to tourists. We also sell products online to people all over China.

Reporter: Have these changes greatly improved your lives?

Ms Wu: Yes! We now have new houses. And our village has just built a new hospital and a library.

Reporter: Wonderful! Together you are building a new socialist village.

Passage 1

Now that I am older, my life is different from when I was in primary school. For example, my primary school was near my home, so I used to walk to school with my parents. Now my junior high school is farther from home. I take a bus every day with my friends.

My home has changed too. My family used to live in a small flat, but now we have moved to a much larger one. My grandma lives with us now as well. She has her own room and her own TV set. I am glad that I get to see her every day.

The way I study is also different. I have become more confident in my studies and often attend group discussions. I enjoy studying with my friends. It’s amazing how much we have achieved together.

My life has changed in many ways, but one thing has stayed the same: the feeling of love and happiness shared by my family.

Passage 2

In 2017, the new 480-kilometre Mombasa–Nairobi railway was opened. Before then, the only transport links between Mombasa, Kenya's main port, and Nairobi, Kenya's capital, were rough roads and an old railway line completed in 1901. The old trains were very slow. It took 10 hours to get to Nairobi from Mombasa by train.

However, the new railway, built with China's help, has already cut the travel time between

LGPL 3
Free as in Freedom

Mombasa and Nairobi to about five to six hours for passengers. Now, more than two million people use it every year.

Local Kenyans have benefited a lot from the new railway. A government worker said, "I'm very happy with the new railway built by our Chinese friends. Many changes have taken place in the town over the last few years, and the people who live here have become rich." A businessman said, "My experience of using the train since 2017 has been good. It is very convenient and doesn't cost much money. I am able to get to places on time and make business deals with ease." The railway has also made the transport of food easier. "It used to take hundreds of lorries to carry food between the two cities, but now it takes only two or three trains," said a supermarket manager. As a result, people now have more fresh food to eat.

Although China and Kenya are far away from each other, the railway shows how different countries can work together to build a better world.

Passage 3

Love My Hometown, Build My Hometown

With a deep love for their hometown, people of different ages and professions are contributing to its development and growing along with it. Today, let us explore three such stories.

The watermelon farmer

Liu Guanghui is an agricultural technology expert in watermelon farming. Although he is more than 70 years old, he still spends most of his days working in the sun on the farmland. He wears a wide hat, and his skin is brown from the sun. He loves farming and has spent his life researching ways to improve it. On his days off, Guanghui provides local farmers with technical training and guidance for free. With joint efforts of the government, farmers, and experts like him, the farming economy in the province has grown by more than one billion yuan over the years.

The flower live-streamer

Jiang Hui's friends and fellow villagers call her the "flower girl". When she was young, Hui often visited her aunt's flower field after school, where she learnt how to grow flowers. She also showed great talent in putting different flowers together beautifully. After graduating from university, Hui

LGPL Free as in Freedom

decided to return to her hometown and start her own flower business. To promote sales, she started to sell her flowers online. It was hard at first, but she didn't give up. She always patiently explained and offered practical advice to customers. Gradually, her online shop became more popular. She also helped other villagers and taught them how to sell agricultural products online. "Many people now know about the agricultural products from our town," Hui said with a big smile. "This makes all the hard work worthwhile!"

The village teacher

When Yuan Bailing was a little girl, it took her almost an hour to get to school each day, but she loved school so much that she never missed it. As she grew up, she witnessed how her village changed greatly over the years. Better roads and bridges have been built. Now it takes only ten minutes for children to get to school. As the first person from her village to graduate from university, Bailing decided to return to her hometown to become a teacher. She wanted to help more children get a good education and be part of her hometown's growth and development. Though the area still needs further development, through the courage and hard work of its people—like Bailing—it has a bright future ahead.

Read, Discuss and Think

I **visited** Shanghai in 2020.　　I **have visited** Shanghai.

KS Simple Past Tense vs. Present Perfect Tense 一般过去时 *vs.*现在完成时

The simple past tense describes an action that was finished at a definite time in the past. The action has no connection with the present. It focuses on what happened at that past time. Time markers of it are: *yesterday, last …, … ago, at that moment, in* + …, etc.

一般过去时描述发生在过去某个确切时间并已经结束的动作，和现在没有关联。强调过去发生了什么，其时标词包括但不限于：*yesterday, last ..., ... ago, at that moment, in* + 过去年份等。

The present perfect tense describes past actions linked to the present. It does NOT state a specific past time. It focuses on the present result, experience or duration up to now. Time markers of it are: *already, yet, never, ever, just, for, since*, etc.

现在完成时描述与现在相关联的过去动作，不强调具体的过去时间，侧重现在的结果、经历或持续到现在的状态，其时标词包括但不限于：*already, yet, never, ever, just, for, since* 等。

If there is a clear specific past time adverbial, we MUST use the simple past tense, NOT the present perfect tense.

如果句中有明确的过去时间状语，必须用一般过去时，不能用现在完成时。

C Vocabulary & Phrases

addict /ˈædɪkt/ n. 对…入迷的人

addicted /əˈdɪktɪd/ adj. 有瘾的；入迷的

addicted to 对…很入迷

advance /ədˈvɑːns/ n. & v. 前进；促进

advanced /ədˈvɑːnst/ adj. 高等的；先进的

aspect /'æspekt/ n. 方面

attraction /əˈtrækʃn/ n. 向往的地方；吸引力

audio /ˈɔːdiəʊ/ adj. & n. 音频的；音频

be attracted to 喜爱

be covered with 被…覆盖

be responsible for 对…负责

bring about 带来；引起

bush /bʊʃ/ n. 灌木

business /ˈbɪznəs/ n. 生意；商业

capital /ˈkæpɪtl/ n. 首都/府；资本

comment /ˈkɒment/ n. & v. 评论；批评

complete /kəmˈpliːt/ v. 完成；结束；
adj. 完全的；彻底的

conclusion /kənˈkluːʒn/ n. 总结

content /ˈkɒntent/ n. 内容；[pl.]目录；

convenient /kənˈviːniənt/ adj. 方便的

corn /kɔːn/ n. 玉米；谷物

digital /ˈdɪdʒɪtl/ adj. 数字的

dirt /dɜːt/ n. 泥土；尘土

discussion /dɪ'skʌʃn/ n. 讨论

ease /iːz/ n. 容易；自在

e-payment /ˈiːpeɪmənt/ n. 电子支付

farmland /ˈfɑːmlænd/ n. 耕地

flat /flæt/ n. 公寓

government /ˈgʌvənmənt/ n. 政府

greatly /ˈgreɪtli/ adv. 大大地；非常

greenhouse /ˈgriːnhəʊs/ n. 温室

high-tech /ˌhaɪˈtek/ adj. 高科技的

highway /ˈhaɪweɪ/ n. 公路

hill /hɪl/ n. 山丘

housing /ˈhaʊzɪŋ/ n. 住房；住宅

internet /ˈɪntənet/ n. 互联网

junior /'dʒuːniə(r)/ adj. 初级的；低年级的

junior high school （美国）初级中学

Kenyan* /ˈkenjən/ n. & adj. 肯尼亚（人）（的）

lack /læk/ n. 缺乏

lead /liːd/ v. 带领；过（某种生活）；
n. 领先地位；主角

link /lɪŋk/ n. & v. 交通路线；联系；连接

lorry /ˈlɒri/ n. 卡车

manager /ˈmænɪdʒə(r)/ n. 经理

man-made /ˌmænˈmeɪd/ adj. 人造的

miracle /ˈmɪrəkl/ n. 奇迹

mouth /maʊθ/ n. 嘴

narrow /ˈnærəʊ/ adj. 狭窄的

port /pɔːt/ n. 港口城市；港口；[计算机]端口

product /ˈprɒdʌkt/ n. 产品

rail /reɪl/ n. 栏杆；扶手；铁轨；铁道

railway /ˈreɪlweɪ/ n. 铁路

root /ruːt/ n. 根

rough /rʌf/ adj. 崎岖的

sandstorm /ˈsændstɔːm/ n. 沙尘暴

sandy /ˈsændi/ adj. 铺满沙子的；含沙的

senior high school （美国）高中

ship /ʃɪp/ n. （大）船；舰

LGPL Free as in Freedom

shortage /ˈʃɔːtɪdʒ/ n. 短缺

socialist /ˈsəʊʃəlɪst/ adj. 社会主义的；
n. 社会主义者

soil /sɔɪl/ n. 土壤

star /stɑː(r)/ n. 星；恒星；v. 主演

support /səˈpɔːt/ n. & v. 支持

the Olympics 奥林匹克 运动会

track /træk/ n. 小路；轨道

tunnel*/ /ˈtʌnl/ n. 隧道；地下通道

villager /ˈvɪlɪdʒə(r)/ n. 村民

wide /waɪd/ adj. 宽的；宽阔的

with ease 轻而易举地

Mombasa /mɒmˈbæsə/ 蒙巴萨（肯尼亚城市）

Seoul /səʊl/ 首尔（韩国首都）

D Expanding Horizons

Poems about Growth and Change

I left home young and not till old do I come back,
Unchanged my accent, my hair no longer black.
My children whom I meet do not know who I am.
Ask where I come from with beaming eye.

少小离家老大回，
乡音无改鬓毛衰。
儿童相见不相识，
笑问客从何处来。

You thought growth was a straight line,
an upward climb with perfect grades,
and motivational quotes stuck to your mirror.
But growth, real growth, looks like falling.
Flat on your face.
Bombing a test you studied for.
Losing a friend you thought was forever.
And then… choosing to get up anyway.
Growth is not glory.
It is grit.
And yes, it is messy.
But it is yours.

Proverbs about Growth and Change

- There is nothing permanent except change.
- Every cloud has a silver lining.
- To improve is to change; to be perfect is to change often.
- If you can renew yourself one day, renew yourself every day.
- When things reach an extreme, change brings smooth progress.

LGPL v3 Free as in Freedom

UNIT 2 Inspiring People

A Dialogues & Passages

Conversation 1

Gina: Dad, do you have a second? We need to do a survey of our family members about their most admired people. Can you help me, please?

Dad: Sure. Go ahead.

Gina: OK, Dad. Who do you admire the most?

Dad: For me, it has to be Isambard Brunel, a famous English engineer. He built the first British railways and many other important things, such as bridges, ships, and tunnels. All these helped the UK develop into a modern nation.

Gina: Oh, I see. How about you, Mum?

Mum: Well, I am really inspired by Florence Nightingale. She created modern nursing. It was wonderful of her to help us understand the need for cleaner hospitals to stop the spread of diseases.

Gina: That's nice. What about you, Steve?

Steve: Isaac Newton, of course. It was so important that he developed physics! I also admire Alan Turing. You know the famous Turing test? It's so cool!

Gina: Yes, I agree. He was a pioneer of computer science. Thanks, Steve.

Conversation 2

Adam: Hi, everyone. Who is the person you admire the most?

Yaming: My favourite person is I. M. Pei.

Adam: Did he design the glass pyramid at the Louvre Museum?

Yaming: Yes. It was very creative of him to design it. The Suzhou Museum is also one of his amazing designs. He created a beautiful balance between the East and the West.

Adam: Wow, you really know a lot about him!

Yaming: I read books and reports about him. I want to be a creative person like him.

LGPL3 Free as in Freedom

Adam: What about you, Chen Jie? Who inspires you?

Chen Jie: Wang Yaping, of course, China's first woman to walk in space. She is full of courage and wisdom. She was also the first woman to teach a live class from space. What about you, Adam? Who do you look up to?

Adam: Me? My biggest inspiration is not a famous person. It's my father. It's really very nice of him to support and encourage my exchange study here.

Passage 1

To me, one of the most inspiring people in Chinese history is Mozi (about 468-376 BCE). It is said that Mozi was a soldier, good at woodwork, and was the inventor of the kite. But in fact, above all, he was a great thinker.

Mozi lived during the Warring States Period. Back then, many kingdoms were fighting against each other. In these wars, the common people were always hurt. To Mozi, this had to stop, so he spent his lifetime trying to bring peace.

His idea of love was one reason that Mozi wanted peace. It was important to him that everyone should show the same kindness and care to everyone else, whether they were family, friends, or strangers. He also believed states should avoid attacking one another.

Though Mozi lived more than 2,000 years ago, his ideas live on. I think he is still a great inspiration to many people. Now, more than ever, people around the world need to hear the message of peace and love, and work together to build a community of a shared future for mankind.

Passage 2

On 25th September 2017, the scientific world was shaken by the news that Chinese professor Zhong Yang had died in a car accident. The well-respected biologist had spent his whole life researching plants and seeds. Over the years, he collected many important seeds for China's seed banks. These special banks protect all kinds of plant seeds, including the ones we need for food, and they make sure that important plants do not disappear from the world forever.

LGPL3
Free as in Freedom

Zhong Yang was born in 1964. When he was young, he showed a deep love for and a curiosity about the things he studied. He was an excellent student, entering university at the early age of 15. There, he studied radio engineering and later became interested in plants. The research and study of plants, especially the seeds, became the focus of his life after he became a professor at Fudan University.

It is important for seed banks to include many different kinds of seeds. When Zhong Yang discovered that there was not enough research on the seeds from Xizang, he went there to collect seeds himself. In 2001, he began his travels across Xizang. It was very difficult for him to brave the cold weather and great heights. He sometimes fell sick, but he always continued with his work.

Zhong Yang knew it was better to include more people when doing important work. He began a programme to find and train local students in field research to become scientists. Together, he and his team collected more than 40 million seeds from over 1,000 types of plants. Their hard work provided the world with lots of new information about the plants in China.

Zhong Yang left behind more than just a huge collection of seeds. His love for his job and research lives on in his students. He once said, "My students will continue on the road of scientific exploration, and the seeds we have collected may grow hundreds of years from now."

Passage 3

Edward Jenner and the Battle against Smallpox

Smallpox used to be one of the worst global diseases. It killed millions of people in history. However, we do not hear much about it any more. Why? Because it is no longer around in nature. This happened mainly because of the work of Edward Jenner (1749–1823), an English doctor and scientist.

Jenner did not have an easy childhood. His parents died when he was young, and his elder brother raised him. It was difficult for him to do well in school, but he had a passion for nature. At 13, he became an apprentice to a doctor for eight years. It was hard for doctors to be well-respected at that time because modern medicine had not fully developed.

When Jenner was 21, he studied at a hospital in London. After he finished his studies, Jenner went back to his home in the countryside because he liked it more. There, he became a family doctor and people started to hear about his good work. In his free time, he continued to do research and study nature.

LGPL Free as in Freedom

It was while working as a doctor that Jenner discovered that milkmaids—women who milk cows—rarely got smallpox. They often got cowpox, a disease like smallpox, but these milkmaids did not get very sick and did not die. He wondered: Do milkmaids get protected from smallpox just because they often get cowpox?

To test this, Jenner came up with the idea of first giving some people cowpox, then giving them smallpox. These people did not get the smallpox! After many other tests, he realised that cowpox could actually be used to protect people from getting smallpox.

Jenner invented a new word to describe what he had created: "vaccine". The word comes from the Latin word for "cow". It is wonderful that, because of Jenner's work, smallpox is not around any more and people no longer die from it. His pioneering research has been used to create vaccines for other diseases.

LGPL3
Free as in Freedom

B Key Structures

Read, Discuss and Think

1. **It** is important **to learn English**.
2. **It** is no use **crying over spilt milk**.
3. **It** is true that **he won the game**.
4. **There** is no way **Poco can win this match**.

KS Dummy Subject and Delayed Subject 形式主语

A dummy subject, also called empty subject is usually the pronoun *it*. It occupies the subject position, but carries no real meaning. The real subject is moved to the end of the sentence. This real subject at the end is called the delayed subject. Some researchers argue that there acts as the dummy subject in existential sentences.

形式主语（虚主语）通常由代词 *it* 充当。它占据主语位置，但本身没有实际含义。真正的主语被移到句子末尾，这个放在句尾的真实主语就叫后置主语。一部分研究人员认为，存现句中的 *there* 充当了形式主语。

There are 2 common types:

· It + be + adj. + to do / doing sth.

· It + be + adj. / n. + that-clause

有 2 种基本结构：

· *It* + *be* 动词 + 形容词 + *to do* / *doing sth*.

· *It* + *be* 动词 + 形容词/名词 + *that-clause*

C Vocabulary & Phrases

above all 最重要的是；尤其是

admirable /'ædmərəbl/ adj. 令人钦佩的

admire /əd'maɪə(r)/ v. 钦佩；赞赏

airport /'eəpɔːt/ n. 机场

anxious /ˈæŋkʃəs/ adj. 焦虑的；不安的

balance /'bæləns/ n. & v. 平衡；保持平衡

bank /bæŋk/ n. 库；银行

BCE abbr. 公元前（before the Common Era）

belief /bɪˈliːf/ n. 信念；看法

biologist /baɪˈɒlədʒɪst/ n. 生物学家

brave /breɪv/ adj. 勇敢的；无畏的；
v. 勇敢面对；经受（困难）

British /'brɪtɪʃ/ adj. & n. 英国（人）（的）

calendar /'kælɪndə(r)/ n. 日历

campus /ˈkæmpəs/ n. 校园；校区

CE abbr. 公元（Common Era）

century /'sentʃəri/ n. 世纪

chemist /'kemɪst/ n. 化学家

chemistry /'kemɪstri/ n. 化学

childhood /'tʃaɪldhʊd/ n. 童年

collection /kə'lekʃn/ n. 收集物；收藏品

Confucius /kənˈfjuːʃəs/ n. 孔子

courage /'kʌrɪdʒ/ n. 勇气；胆量

daughter /'dɔːtə(r)/ n. 女儿

discovery /dɪ'skʌvəri/ n. 发现

disease /dɪ'ziːz/ n. 疾病

drop out (of sth) 辍学；退出

dynasty /'dɪnəsti/ n. 朝代；王朝

exploration /'eksplə'reɪʃn/ n. 探索

flash /flæʃ/ n. & v.（发）光；（发）信号

flash card 教学卡片；识字卡

flight /flaɪt/ n. 飞行；航班

forever /fər'evə(r)/ adv. 永远

herself /hɜː'self/ pron. 她自己；她本人

historian /hɪ'stɔːriən/ n. 历史学家

hole /həʊl/ n. 洞；孔

hunger /'hʌŋgə(r)/ n. 饥饿

inspiring /ɪn'spaɪərɪŋ/ adj. 鼓舞人心的

inventor /ɪnˈventə(r)/ n. 发明家

kindness /ˈkaɪndnəs/ n. 善良

leave behind 留下；遗留；丢下；忘了带

live /laɪv/ adj. 现场直播的

live on 继续存在；继续活着

look up to sb 钦佩；仰慕

mankind /mænˈkaɪnd/ n. 人类

nation /'neɪʃn/ n. 国家；民族

nationality /ˌnæʃəˈnæləti/ n. 国籍；民族

necessary /'nesəsəri/ adj. 必要的；必需的

period /ˈpɪəriəd/ n. 时期；一段时间

physicist /'fɪzɪsɪst/ n. 物理学家

pioneer /'paɪə'nɪə(r)/ n. 先驱；先锋

pyramid /'pɪrəmɪd/ n. 金字塔

radio /'reɪdiəʊ/ n. 无线电；收音机

region /'riːdʒən/ n. 区域；地区

scientific /'saɪən'tɪfɪk/ adj. 科学（上）的

seed /siːd/ n. 种子

socialism /'səʊʃəlɪzəm/ n. 社会主义

spread /spred/ n. & v. 传播；散布；
（spread, spread）

the Warring States Period 战国时期

Tips on Writing Letters of *Gratitude, Apology & Congratulation*

Practical writing refers to practical-style texts with established conventional formats for conveying messages, conducting communication, keeping promises and following accepted customs. As one kind of practical writing, letters enjoy the highest frequency of use. Here is the writing template for letters of gratitude, apology & congratulation.

✧ **Letters of Gratitude, Apology & Congratulation**

Dear XXX,

I'm writing this letter to express my sincere thanks / apology / for / congratulations on _____ (感谢/致歉/恭贺的事由或事项)

For all you / I have done, my true appreciation / apology is beyond the words' description. / I cannot tell you how excited I am for what you've achieved. (细节)

To repay your kindness / To make amends / To celebrate this wonderful moment, I'd like to _____. Once again, I sincerely hope that you can accept my heartfelt appreciation. / I feel really sorry for any inconvenience I have caused / Again, congratulations and best wishes for continued success.

Yours sincerely,

XXX (姓名)

UNIT 3 Smart Learning

A Dialogues & Passages

Conversation 1

Mr. Smith: Welcome to the English club! Today's question is: What are some good ways to learn English?

Fu Xing: I like to learn new words by using flashcards.

Mr. Smith: Yes, flashcards are easy to carry around and let you review the words.

Teng Fei: It's also good to note down useful expressions and word groups.

Mr. Smith: Right. It's helpful to put words into meaningful groups. I also want to know whether you read English books outside class.

Yaming: Yes. I like reading a lot, both in English and Chinese.

Mr. Smith: Good. I believe reading is important for learning in general.

Meimei: I like reading too. But I can't read very fast.

Fu Xing: I guess maybe you need to read books that suit your English level.

Mr. Smith: Yes, choose something interesting and easy to read. Read something every day and read widely. The more you read, the faster and better you'll become. Any other ideas?

Conversation 2

Ella: Hi, this is Ella's podcast. Today's guest is Binbin. He's going to give us some ideas for learning English.

Binbin: Hi, Ella. Thanks for having me! For learning English, I think first you need to become an active learner.

Ella: What do you mean by that?

Binbin: Well, because I want to speak English well, I practise English all the time.

Ella: Oh, you must spend a lot of time studying!

Binbin: Well, it doesn't mean you have to study all the time. You need to spend time using the language. For example, I speak English with friends. I repeat the dialogues from the films I like. I read English books, and sometimes I write my diary in English.

LGPL 3 Free as in Freedom

Ella: Wow! I guess you really enjoy learning.

Binbin: Yes, it's true! But you see, I started out at zero and came across problems. I mean, you just have to take things step by step. Start simple and build up.

Ella: That's so true.

Passage 1

Chen Lei Age 15

My love of books comes from my mother. Because of her, our home is full of books on different subjects.

When I was a child, my mother used to sit me on her knee, tell me stories, and teach me how to read. Soon, I was reading by myself. Over time, I found children's books no longer kept me interested. So I started reading other books, newspapers, and magazines. I especially enjoyed popular science books and books about the lives of famous people. After dinner, I would just pick a book from the shelf to read in my room. Reading opened up new worlds and allowed me to discover new things for myself. In general, I prefer print books, but sometimes I read e books. I think that reading is great fun.

Now that I am older, I can always find time to read in the school library. I believe that reading has helped me a lot with my schoolwork and made me more confident about my future.

Passage 2

How to Become a Successful Learner

Everyone has the ability to learn. Experts on the science of learning will tell you that anyone can become a successful learner. However, many students do not realise this, and they have trouble learning.

Studies show that the first key to becoming a successful learner is to have a growth mindset. This means, in part, believing in yourself. It also means setting goals, taking action, and meeting challenges. People with a growth mindset see mistakes as chances for learning, as they teach us

LGPL3
Free as in Freedom

how to improve.

Research also shows that practice is important for learning. The more we practise, the better we learn. We learn best by practising new and difficult things. Sometimes it is also important to get guidance from a teacher or a coach. They can show us the right way to practise and give us important feedback and advice.

In addition, studies show that students learn more when they hang out with other students who are serious about study. First, by being together, students can easily learn from each other. Second, students are challenged to do better by each other. This has been proven to encourage learner growth.

Successful learners also use the best learning materials they can find. In the 21st century, this means using new technology and resources, not just textbooks. Since there are so many learning materials on the internet, it is important to think carefully and choose wisely what and how you study. Take advantage of the best tools and resources to learn wisely and efficiently.

Finally, successful learners see learning as part of daily life. It is something they will do even after they leave school, and even when they are old. As you continue on your learning journey, you should try to walk at your own speed and enjoy the trip. Never lose heart. The road ahead of you may be long and may have many mountains and valleys, but it also has great treasure. You will find more joy in living a life with learning!

Passage 3

The Problem of Procrastination

Cathy knew that she had an essay due on Monday. However, instead of beginning work on it today, she waited until the last minute and started on Sunday night. Of course, it was impossible to do a good job writing an essay in one night, so she got a bad grade. She then kicked herself for not starting earlier and promised to do better next time, but she didn't.

Does Cathy's story sound familiar? Like Cathy, many of us procrastinate—we put off doing something important until the last moment. But why do we do this? Some research shows that we procrastinate because of negative feelings, such as fear or worry. We are afraid of doing a poor job or getting bad grades. We think that we might fail. We put off doing the work in order to avoid having these bad feelings. Sadly, we are more likely to fail or do poorly when we procrastinate. This creates even more negative feelings and makes it likely that we will procrastinate the next

LGPL
Free as in Freedom

time.

The long-term solution to this problem is to deal with our negative feelings. We need to forgive ourselves for failing. We need to accept that sometimes we will not meet the goal. We also need to realise that difficult work isn't always a bad thing. It is through difficulty that we learn and grow.

So what can we do? Here are some tips. First, realise that once we face our fears and get started, our fears often go away, and we start to enjoy the work. Second, break large projects into small parts, each with their own smaller deadline. Take each thing step by step. Third, reward yourself for getting something done. Relax or do something fun, then get back to work. Finally, remove temptation. This means if you watch TV to put off work, then work at the library. If you chat with friends to put off work, then work alone and turn off your phone. Find a place to work that does not have such distractions.

In the end, it is up to you and the actions you take to overcome procrastination. So what are you waiting for?

LGPL v3
Free as in Freedom

B Key Structures

Read, Discuss and Think

1. I think **(that) he is right**.
2. I have found out **(that) all the tickets for the concert have been sold out**.
3. We believe **(that) our team can win the game**.
4. We hope, on the contrary, **that he will stay at home with us**.
5. He said **(that) the book was very interesting** and **that all the children like to read it**.
6. He has no special fault except **that he smokes too much**.

KS Objective Clauses with *that* 宾语从句（*that*）

An objective clause is a subordinate clause used as the object of a verb or a preposition. *That* is the common conjunction to introduce an objective clause. The basic structure is: S + *do* + (that) + objective clause + other elements.

宾语从句是充当动词或介词宾语的从句，*that* 是引导该从句常用的连词，其基本结构为：主句 + 动词 + *that* + 宾语从句 + 其他。

If the predicate verb of the main clause is in the present tense, the clause can use any proper tense according to the fact. If the predicate verb of the main clause is in the past tense, the clause usually shifts to the corresponding past tense. If and only if what is stated is an objective fact, the clause keeps the present tense.

主句为现在时，从句时态根据情况选用；主句为过去时，从句通常要顺延为对应的过去时态，当且仅当从句叙述的是客观事实时保持现在时态。

Conjunction *that* can be omitted when it introduces an objective clause, but it cannot be omitted in some formal cases including after parenthetical expressions, in dummy object structures, after prepositions, after certain verbs like *agree, announce, argue, assume, explain, maintain,* etc., or when multiple *that* clauses are listed.

引导词 *that* 通常可以省略，但当宾语从句前有插入语、存在形式宾语结构、介词后引导的宾语从句、特定动词（如 *agree, announce, argue, assume, explain, maintain* 等）后的宾语从句或多个宾语从句并列时，引导词 *that* 不能省略。

LGPL Free as in Freedom

C Vocabulary & Phrases

actively /ˈæktɪvli/ adv. 积极地

addition /ə'dɪʃn/ n. 添加；加法

advantage /əd'vɑːntɪdʒ/ n. 优势；优点

aloud /əˈlaʊd/ adv. 出声地；大声地

annoy /əˈnɔɪ/ v. 使恼怒；打扰

annoyed /əˈnɔɪd/ adj. 恼怒的；生气的

at last 终于；最终

awkward /ˈɔːkwəd/ adj. 令人尴尬的

ballet /ˈbæleɪ/ n. 芭蕾舞

build up 增加；加强；创建

click /klɪk/ v. 点击；（使）发出咔嗒声

come across （偶然）遇见；发现

concentrate /ˈkɒnsntreɪt/ v. 集中注意

debate /dɪˈbeɪt/ n. & v. 辩论；争论

dialogue /ˈdaɪəlɒg/ n. 对话；对白

dictionary /ˈdɪkʃənri/ n. 词典；字典

e-book /'iːbʊk/ n. 电子书

efficiently /ɪ'fɪʃntli/ adv. 效率高地

enjoyable /ɪnˈdʒɔɪəbl/ adj. 有乐趣的

experiment /ɪkˈsperɪmənt/ n. 实验；试验

extra /ˈekstrə/ adj. 额外的；附加的

extra-curricular /ˌekstrəkəˈrɪkjʊlə(r)/
adj. 课外的；课程以外的

feedback /'fiːdbæk/ n. 反馈的意见

female /ˈfiːmeɪl/ adj. & n. 女（的）；雌（的）

fluent /ˈfluːənt/ adj. 流利的；熟练的

freshman /ˈfreʃmən/ n. 一年级新生

frightened /ˈfraɪtnd/ adj. 惊吓的；害怕的

general /ˈdʒenrəl/ adj. 总的；大体的

grammar /ˈgræmə(r)/ n. 语法

growth /grəʊθ/ n. 成长；增加

guidance /'gaɪdns/ n. 指导

D Expanding Horizons

How to Learn English Effectively

English serves as a global bridge connecting people from different cultures. Mastering it opens chances for further education, cross-cultural communication and future career development. However, many learners feel frustrated, for they spend plenty of time but make little progress. The truth is that effective English learning relies on proper strategies and long-term persistence, rather than natural talent or short-term cramming.

Building vocabulary wisely lays a solid foundation. Instead of memorising isolated word lists, you should learn new words in real reading and listening contexts. When you come across unfamiliar words in poems, news reports or short videos, note them down together with complete sentences. This way you can grasp their real usage, not merely Chinese translations. Regular spaced review is also necessary; otherwise, newly-learned words will slip out of your memory quickly.

It is equally important to develop the four skills as a whole: listening, speaking, reading and writing. Make good use of spare time to listen to suitable English materials. Do not be afraid of making mistakes while speaking. You can read aloud, talk to yourself or join English corners to build confidence. Choose reading materials matching your present level, such as simplified stories and cultural articles. Keeping an English journal several times each week helps organise thoughts and polish writing ability.

Besides learning skills, your attitude matters a great deal. Language learning is a gradual journey full of setbacks. It is normal to meet barriers and feel stuck sometimes. Do not expect rapid success. Small daily efforts beat occasional long-time hard work. Set small, clear goals and celebrate tiny progress. If you stick to scientific methods and stay patient, your language ability will improve step by step.

UNIT 4 Our Memory

A Dialogues & Passages

Conversation 1

Billy: Professor, I don't quite understand what you said about linking knowledge.

Professor: Well, knowledge is like a chain, and new knowledge is best remembered by linking it with old knowledge. The more links you create, the more you remember.

Fu Xing: Professor, I often get some words mixed up, like "kitchen" and "chicken".

Professor: Pay attention to details. Study how they are different from each other. You can also create a picture for each word in your mind.

Peter: Hello, Professor, could you tell me why it is much easier to forget things to buy than to forget how to ride a bike?

Professor: Scientists are still working on this mystery. For one thing, the memory of how to ride a bike is probably stored in a more stable area of our brain.

Peter: There are so many mysteries about our brain!

Professor: Exactly! And at your age, your brain is developing fast, so put it to good use!

Conversation 2

Chen Jie: Why do you look worried, Rick?

Rick: Yesterday I visited my grandma, but she kept calling me Johnny.

Chen Jie: Who’s Johnny?

Rick: My dad!

Chen Jie: Oh dear!

Rick: And then she told me not to eat the cookies because she was saving them for her grandson.

Chen Jie: Who’s that?

Rick: Me!

LGPL3 Free as in Freedom

Chen Jie: Well, that's not a good sign.

Rick: No. My parents are taking her to hospital tomorrow.

Chen Jie: Good. Follow what the doctor says. She may need special care.

Rick: Yeah. I just feel so sad. I don't understand what she's going through.

Chen Jie: Well, you know how some people's memory gets worse as they get older. It happened to my grandpa too.

Rick: Oh, no. What happened?

Chen Jie: We used to fly kites in the park. But now he forgets how to reach the park. So, I walk him there every weekend.

Rick: That's sweet!

Chen Jie: Thanks. Instead of what he forgets, I keep in mind what he remembers. In your case, your grandma still remembers that you love cookies!

Rick: You're right! Thanks, Chen Jie!

Passage 1

In the past, I always felt stressed when I had to give a speech. I used to spend lots of time trying to memorise my speech, but I still forgot some parts. Last week, I decided to find out what the right way is to memorise a speech. I looked online and asked friends, and I found many useful methods.

I learnt how to create a speech outline. Instead of trying to remember every word of my speech, I remembered the key words first. Then I formed images of these key words in my mind, and linked them in order.

Another method is to divide the speech into short sections. I practised the first section until I could fully recall it. Then I moved on to the next. This helped me to find out which parts of the speech I needed to work on the most.

Finally, a friend told me that I should have confidence in myself. Nobody knows my speech except me. If I do forget some words, I shouldn't panic. Just remember the key words and continue!

I followed all these great methods and my speech today was a great success!

LGPL3 Free as in Freedom

Passage 2

How to Boost Your Memory

Would you like to improve your memory? To start with, it is important to understand how memory works.

There are two main kinds of memory: short-term memory and long-term memory. Short-term memory helps you remember things that you may only need for a short time, like phone numbers when you need to make a phone call. Long-term memory is the ability to remember things for days, years, or even a lifetime. So the real question is: How do you make sure what you learn enters your long-term memory? By using some clever memory techniques and leading a healthy life, you will see some great results. Let's take a look.

First, pay attention. However, you might fail to remember all the details. So, try taking notes by writing down key points. After all, it is easier to remember a summary than every word in a passage.

Second, use it or lose it. The more you review what you learn, the more likely you will remember it. However, you should not wear out your brain. Try studying for 40 minutes, and then take a break. You can also review information by discussing it with others or by teaching others.

A third way is to make use of your senses. Create images by using tables, graphs, and mind maps to organise information. You can also create a story with information and view it in your mind like a film. In addition, make use of your other senses. For example, listening to recorded information can be very effective.

Last but not least, boost your memory by staying healthy.

· Sleep well. While you sleep, your brain organises your memories. Bad sleep makes it harder for new information to enter your long-term memory.

· Eat well. Your brain needs food like an engine needs fuel. Healthy food and drink will help your brain work much better.

· Exercise. A healthy and active body boosts both your memory and your mind. Exercise can also reduce stress and anxiety.

Many more memory techniques can be found in books or online. Try some different methods to see which ones work best for you. You are sure to improve your memory!

LGPL Free as in Freedom

Passage 3

Brain Sports

How good is your memory? How many words can you memorise in 15 minutes? Well, some people can memorise 335 words. Some people are even more amazing. For example, someone once memorised the order of 2,530 playing cards in just one hour!

Just as there are sports competitions using our bodies, there are also sports competitions using our minds, such as the World Memory Championships. These were held in Wuhan, China, in 2019. There were many different events. For instance, the "brain athletes" had to remember as many names and faces as they could or as many words as possible in 15 minutes.

While you might think that these competitors were all born with a strong memory, this is often not true. For example, one champion has an average memory, but he makes full use of memory techniques. So, if he wants to remember the names of the Great Lakes in the US and Canada, he thinks of HOMES, because each letter in HOMES stands for a different lake.

Many competitors use what is called a "memory palace" to remember things. While most people are terrible at remembering lists, they are quite good at remembering where things are. Think about your bedroom. You can probably picture in your mind where everything in your bedroom is. Now, picture in your mind the things in the different places in your bedroom. Later, if you want to remember the words, all you need to do is remember the picture.

Memory competitions are not for everyone, and not everyone is a brain athlete. On the other hand, some of their memory techniques may be useful to you in your studies. You should give them a try!

LGPL3 Free as in Freedom

B Key Structures

Read, Discuss and Think

1. I don't know **if/whether he will come**.
2. She asks **whether you like music or not**.
3. We haven't decided **whether to go or stay**.
4. He wants to know **if/whether we can help him**.

KS Objective Clauses with *if / whether* 宾语从句（*if / whether*）

An objective clause is a subordinate clause used as the object of a verb or a preposition. *If* and *whether* are conjunctions used to introduce objective clauses when the clause is an uncertain question. The basic structure is: S + *do* + *if/whether* + objective clause + other elements.

宾语从句是充当动词或介词宾语的从句，*if* 和 *whether* 是引导宾语从句的连词，意为“是否”，用于从句表达不确定的疑问，其基本结构为：主句 + 动词 + *if/whether* + 宾语从句 + 其他。

If the predicate verb of the main clause is in the present tense, the clause can use any proper tense according to the fact. If the predicate verb of the main clause is in the past tense, the clause usually shifts to the corresponding past tense. If and only if what is stated is an objective fact, the clause keeps the present tense.

主句为现在时，从句时态根据情况选用；主句为过去时，从句通常要顺延为对应的过去时态，当且仅当从句叙述的是客观事实时保持现在时态。

In most cases, if and whether can be exchanged. But there are some situations where only whether can be used including: before or not, before an infinitive, after prepositions, and when placed at the start of the clause for emphasis.

大多数情况下，*if* 和 *whether* 可以互换。但有些场景只能使用 *whether*，包括：在 *or not* 之前、在不定式之前、在介词之后，以及从句前置用于强调时。

C Vocabulary & Phrases

account /ə'kaʊnt/ n. 账户；账目

address /ə'dres/ n. 地址

anxiety /æŋ'zaɪəti/ n. 焦虑；担心

arrangement /əˈreɪndʒmənt/ n. 安排；筹备

behaviour /bɪˈheɪvjə(r)/ n. 行为；举止

blood /blʌd/ n. 血

boost /bu:st/ v. & n. 促进；（使）增长；帮助

D Expanding Horizons

The Ebbinghaus Forgetting Curve

Many students are troubled by a common problem: knowledge they have learned with great effort slips away quickly. This universal memory phenomenon was systematically studied by Hermann Ebbinghaus, a German psychologist. In 1885, he published his landmark work *On Memory*, introducing the famous Forgetting Curve, which describes how human memory fades over time without proper review.

Ebbinghaus carried out strict experiments on himself. To avoid the influence of personal feelings and existing knowledge, he created many meaningless nonsense syllables for memorisation. He tested his memory at different time points ranging from twenty minutes to one month after learning. His research drew a clear conclusion: forgetting does not happen evenly. Memory drops sharply right after learning, and then the speed of forgetting slows down gradually. Without any reinforcement, people forget most newly-acquired information within the first 24 hours, and only a small amount of content can remain in long-term memory.

Nevertheless, the Forgetting Curve is not merely a description of memory loss. It offers an effective solution known as spaced repetition. If learners review knowledge before they completely forget it, memory strength will increase. Every successful review lengthens the interval for the next review. Compared with long-time cramming in one day, short but regular reviews produce far better learning outcomes.

It should be noted that this curve serves only as a general reference model. Multiple factors change the speed of forgetting. Information connected with personal experience and logical meaning is much easier to remember. Meanwhile, lack of sleep, heavy stress and mental tiredness will speed up memory loss.

This theory has huge practical value for English learners. When memorising vocabulary, texts or grammar rules, timely spaced review helps turn short-term memory into stable long-term knowledge. It reminds us that real learning includes not only absorbing new knowledge, but also scientific repetition to fight against the natural law of human forgetting.

UNIT 5 Power of Ideas

A Dialogues & Passages

Conversation 1

Ella: Hi, Han Lin! Did you go to the International Exhibition of Inventions last weekend?

Han Lin: Yes, some amazing inventions were shown from all over the world.

Ella: What invention did you like the most?

Han Lin: Oh, the 3D printer was amazing.

Ella: Why?

Han Lin: Almost everything under the sun can be made by it.

Ella: Really? Like what?

Han Lin: Well, all kinds of everyday objects. Toys, chairs, tables, and even houses can all be made by the 3D printer.

Ella: That's cool!

Han Lin: Yeah. And in medicine, for example, arms and legs, and even hearts can be created by the 3D printer.

Ella: That's great! How does it work?

Han Lin: Well, first, the object is designed on a computer. Then, a file is created and sent to the 3D printer. The 3D printer reads the file, and after that, the object is produced by building up plastic.

Ella: Is only plastic used?

Han Lin: No, other materials can also be used to produce things. It can even make food.

Ella: Oh, really? I'd love to try 3D-printed food!

Conversation 2

Fu Xing: What do you think is the most useful invention of all time, Peter?

Peter: It has to be the radio.

Fu Xing: The radio? Why?

Peter: Before the radio was invented, information travelled very slowly. The world was made much

LGPL Free as in Freedom

smaller by the radio. Suddenly, news could be spread around the world in seconds.

Fu Xing: Right. Who was the inventor?

Peter: An Italian inventor called Guglielmo Marconi. He developed the idea in the 1890s. In 1901, a radio message was sent across the Atlantic Ocean for the first time.

Fu Xing: Wow! That was quite a distance at that time.

Peter: Yeah. And because of the radio, some other important inventions were developed as well.

Fu Xing: Like the television?

Peter: That's right. It also had a big effect on music. The radio made it much easier for people to enjoy music from artists around the world.

Passage 1

The invention of the plane has greatly changed the world. However, it seems that its inventors, Orville Wright and Wilbur Wright, were not looking to change the world at all. Rather, they just wanted to fly like birds.

To solve the problem of heavier than air flight, the Wright brothers began working with gliders. There were two main challenges. The first was how to get the glider into the air. The second was how to control it once it was flying. For both problems, they found their solutions by looking at how birds flew. After they solved these problems, they added an engine to the glider. Then, in December 1903, the world's first plane flights were made.

The invention of the plane has made our travels around the world much easier and faster. Journeys that once took days, weeks, or even months, can now be made in only a few hours. As a result, communication among people in different countries is now much easier, and the world has become a much smaller place.

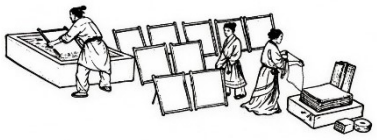

Passage 2

An Invention That Changed the World

LGPL Free as in Freedom

Can you imagine a world without books, newspapers, or magazines? All of these things depend on one invention—papermaking. It, more than any other invention, was responsible for the rapid spread of information that shaped our modern world.

In ancient China, many different materials were used to write on, such as animal bones, bronze ware, stones, wood, bamboo, and even silk. In the Western Han Dynasty, there was also a very early form of paper made from jute—a fibre that comes from plants. However, all of these materials were either difficult to use and store, or very expensive.

As the head officer of the palace workshop for the emperor in the Eastern Han Dynasty, Cai Lun became interested in trying to solve the problem. Different methods for creating something to write on were tried, but none were ideal. At that time, some kinds of bark—the outer part of trees—were used to make clothes. From past experiences, Cai Lun got the idea that bark, certain plants, and old clothes could be used to make a special material suitable to write on.

In the first step of Cai Lun's experiment, all the ingredients were mixed and boiled in water. Then, this material was beaten, cut up, and mixed with water again. Next, the liquid was poured over a bamboo screen, leaving just the fibre. Finally, this fibre was dried and pressed to form paper. To everyone's surprise, this paper was soft, light, easy to make and use, and most importantly, cheap. In 105 CE, Cai Lun showed his creation to the emperor. The emperor was very pleased and praised Cai Lun for his great work.

Later on, the papermaking technique not only speeded up the development of Chinese culture, but also changed civilisations around the world. It first spread to China's neighbouring countries and finally reached Europe through Arab countries in the 12th century. When the use of paper and printing came together in later centuries, it led to a rapid increase in the number of books. This resulted in a new birth of knowledge, creating the world we have today.

Passage 3

Young Inventors

You may think that all inventors are adults with rich experience and university degrees, but you would be wrong. In fact, many famous inventions have been created by teenagers just like you.

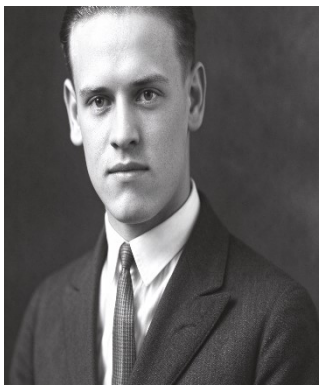

LGPL
Free as in Freedom

Helping the blind to read

At the age of three, Louis Braille became blind as a result of an accident. At a school for the blind, he was taught to read using books with raised letters. Blind people would run their fingers over the letters and guess their shapes. However, sometimes it was confusing because letters like "Q" and "O" were very similar, and they also took up too much space on a page. To solve these problems, a system was invented where letters were replaced with a code of raised dots. However, this new method was still too slow and difficult. At the age of 15, Braille made important improvements to the raised dot system. He made the code simpler and reduced the number of raised dots. Braille's system was incredibly successful and is still used today around the world.

Bringing entertainment to our homes

Philo Farnsworth was a teenager when he read about the problem of creating an electronic television in a science magazine and became interested in it. One day, while he was working on a farm, he noticed the straight rows of crops, and it gave him an idea. Perhaps an image could be broken down into lines, changed into electronic signals, and then sent through the airwaves. For years, Farnsworth worked to develop his idea, but he faced many challenges along the way. Many people did not believe his idea would work, and he found it difficult to get money to pay for his research. However, he never gave up. When he was 21, he eventually succeeded in sending a simple image using his invention. This breakthrough was an important step in creating the modern televisions that we use for entertainment today.

These stories show that with a passion for solving problems, anyone can make a difference in the world, no matter how old they are. So, if you have an idea that you believe in, do not be afraid to go for it. Who knows? You may just be the next Louis Braille or Philo Farnsworth.

LGPL3
Free as in Freedom

B Key Structures

Read, Discuss and Think

1. I don't know **where he lives**.
2. Could you tell me **what you are looking for**?
3. She asks **how we can get there**.
4. He wants to know **who has broken the window**.
5. I wonder **when they will arrive**.

KS Objective Clauses with Question Words 宾语从句（疑问词）

An objective clause is a subordinate clause used as the object of a verb or a preposition. We can use question words to introduce objective clauses. These words keep their original meanings and act as sentence components inside the objective clause. The objective clause must use declarative word order (S + V). But when the question word is the subject of the objective clause, the word order stays S+V naturally.

宾语从句是充当动词或介词宾语的从句，疑问词是宾语从句的引导词，保留本身词义，并在宾语从句内部充当句子成分，含有疑问词的宾语从句必须使用陈述语序，但当且仅当疑问词在从句中充当主语时从句保持原问句语序不变。

If the predicate verb of the main clause is in the present tense, the clause can use any proper tense according to the fact. If the predicate verb of the main clause is in the past tense, the clause usually shifts to the corresponding past tense. If and only if what is stated is an objective fact, the clause keeps the present tense.

主句为现在时，从句时态根据情况选用；主句为过去时，从句通常要顺延为对应的过去时态，当且仅当从句叙述的是客观事实时保持现在时态。

C Vocabulary & Phrases

3D /θriːˈdiː/ adj. & n. 三维的；三维

afford /əˈfɔːd/ v. 买得起；能做

Arab /ˈærəb/ adj. & n. 阿拉伯的；阿拉伯人

be looking to do sth 试图找到做某事的方法

be supposed to do / be sth 应当做（某事）

Tips on Writing a Notice

Practical writing refers to practical-style texts with established conventional formats for conveying messages, conducting communication, keeping promises and following accepted customs. As one kind of practical writing, notices are generally used to inform a specific group of people of a particular matter, or to recruit members for an activity targeted at such a group. Here are writing templates for notices.

✧ **Notices of Activities**

NOTICE

DATE

Since it's our great desire for (目的), (名称) will be held in (时间、地点).

To be specific, the details concerning (名称) could be listed as follows. (细节：形式、条件、环节、注意事项等)

Those who are interested in the above activity are welcomed to join the (名称). For detailed information / If you have any questions, please (联系方式).

XXX (组织单位或发布人)

✧ **Notices of Recruitments**

XXX Wanted

UNIT 6 Beyond Earth

A Dialogues & Passages

Conversation 1

Ms. Wang: All right. So, we've done some experiments. Now it's time for questions.

Anna: Hi, Ms. Wang! I want to know how it feels to be weightless.

Ms. Wang: Oh, it's so much fun! I can turn around easily! You see, I can move everywhere by just pushing against the wall!

Mike: Ms. Wang, what does Earth look like from the space station?

Ms. Wang: It looks like a huge shining ball. It's really beautiful.

Julie: Ms. Wang, I want to know how you eat up there.

Ms. Wang: Nice question. Well, all our food is prepared on Earth and kept in bags. We have over 120 dishes to choose from.

David: What's difficult about living in space?

Ms. Wang: Well, it's a little hard to fall asleep. We have to be tied down so we don't fly away!

Li Hua: Do you get bored? Will you be visited by other astronauts?

Ms. Wang: It's never boring in space. Actually, two astronauts will arrive next month. It's very exciting.

Conversation 2

Host: Our question today is: Why do we explore space? Let's talk to space scientist Dr. Yang. Welcome, Dr. Yang!

Dr. Yang: Thank you very much. Well, there are three good reasons to explore space. First, to improve our knowledge of Earth and its place in the universe.

Host: Could you explain that a bit more?

Dr. Yang: Sure. The study of other planets helps us better understand Earth's geology, history, and relationship with other planets.

Host: Oh, right.

LGPL3 Free as in Freedom

Dr. Yang: Second, technology developed for space can benefit us here on Earth.

Host: Could you give our listeners an example?

Dr. Yang: Of course. Some satellites, for example, help us deal with problems caused by climate change.

Host: Yes, that's very useful. And the third reason?

Dr. Yang: Well, at some point in the far future, we may find new resources in outer space. It might sound crazy, but our Earth may run out of resources. In that case, a new home for us human beings will be needed.

Host: Wow, interesting! Maybe Mars will be turned into our new home in the future.

Passage 1

My Space Dream

My space dream is that one day a research station will be built on the moon. I believe there are quite a few benefits.

First, it will be a good place for scientists to cooperate and do space research together. New technologies can be developed, tested, and operated there. These technologies can then be used to help build stations on Mars and other planets.

Second, more resources will be found. I think the moon may have some special kind of energy resource that can be useful to Earth. It will just take time for scientists to find it.

Third, people may live and work there. Tourists will also be able to visit. I want to be one of the first visitors. I hope that one day we humans can spend holidays in space and explore the universe.

Humans have achieved many things that were once only dreams. I hope the research station on the moon will be built in the near future, and I hope it will happen during my lifetime.

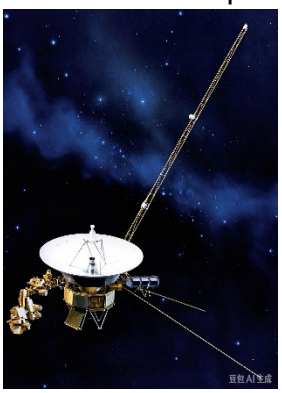

Passage 2

Reaching for the Stars

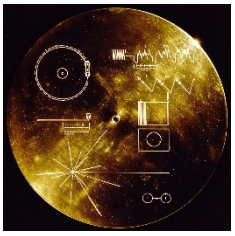

Since the beginning of human history, people have looked up at the stars and wondered what they were like. Many ancient cultures believed that these points of light were from gods or other mysterious worlds. However, as science and technology developed, we learnt the truth about stars. They are real places like our own sun, and they are farther away than anyone imagined.

LGPL3 Free as in Freedom

This raises the question: Can we visit the stars one day?

The man-made object which has travelled farthest from Earth is Voyager 1. This spacecraft was launched in 1977. In case Voyager 1 is found by alien life, a special record with sounds and pictures from Earth is carried on board. As of 2025, Voyager 1 was over 25 billion kilometres from Earth, but that is still a long way from Earth's second-closest star, Proxima Centauri. That star is 4.2 light years away—about 40 trillion kilometres!

The challenge of visiting the stars gets even bigger for space flights with humans. The farthest that any human has travelled in space is only about 400,000 kilometres, to the far side of the moon. Time is a big problem. At present, even a journey to the planet Mars will take around six to nine months. What will the astronauts eat and drink during this period? And how about their health and safety? These problems grow when we talk about visiting another star. It might take hundreds of thousands of years to get there!

Scientists, however, believe that visiting the stars is not a completely wild dream. One idea is to have the astronauts sleep during their journey, like some animals do in winter. Another is to develop much faster spacecraft.

While this is not possible right now, with nations and scientists cooperating with one another, there is hope that the necessary technology will be developed. Humans have photographed other galaxies, set foot on the moon, and even successfully landed rovers on Mars. It seems likely that one day we will reach the stars!

Passage 3

All about Satellites

In October 1957, people listening to radios around the world heard something no one had ever heard before. For three weeks, there was just "beep, beep, beep". About one beep a second. Millions of people sat round their radios just listening for this beep. The beep itself was not all that amazing. The amazing thing was the place where it came from—space. The beep came from the world's first man-made satellite, Sputnik (Спутник) 1.

LGPL3 Free as in Freedom

Sputnik 1 was launched by the Soviet Union on 4 October 1957. It was round, made of metal, and more than twice as wide as a basketball. It weighed about 84 kilogrammes, travelled at 29,000 kilometres an hour, and took 96.2 minutes to circle Earth. Sputnik 1 stopped beeping when its radio battery died on 26 October, and it burnt up when it fell back to Earth on 4 January 1958.

The launch of Sputnik 1 also began the age of satellites. The first satellites were used for research. Through them, we can better understand the world we live in. They also send back photographs that help us to make better maps of our world.

Communication satellites were also soon developed. These allow TV and radio signals to be sent across oceans or to places thousands of kilometres away. This is how people can watch TV across continents and oceans. Weather satellites soon followed. These can tell us when a storm is coming or whether it will snow next week. One new kind of satellite that is now becoming more useful to the public is the positioning satellite. This satellite works with a highly complicated system, like the BDS (BeiDou Navigation Satellite System), which can tell us where our car or even our mobile phone is.

It seems that there is no end to the possible uses of satellites. The only real limit to their use is our own imagination.

LGPL3
Free as in Freedom

B Key Structures

Read, Discuss and Think

1. Rice **is grown** in the south.
2. The bridge **is being built**.
3. The task **has been finished**.
4. The letter **was sent** yesterday.
5. A meeting **was being held** at 8 last night.
6. The work **had been completed** before he arrived.
7. A new hospital **will be opened** next year.
8. A party **is going to be held** this weekend.
9. The rules **must be followed**.
10. He gave me a book.

    A book **was given to** me by him.　　I **was given** a book by him.

11. We keep the room clean.

    The room **is kept** clean by us.

KS Passive Voice in All Tenses 被动语态

The passive voice is used when the receiver of the action becomes the subject. The basic structure is: *be done*. The form of *be* changes according to tense.

被动语态中，动作的承受者充当主语。核心形式为 *be* + 过去分词，*be* 动词随不同时态改变形式。

Some verbs like *give, send, show, tell, pass, offer,* etc., take two objects: an indirect object (recipient) and a direct object (thing). We can make two passive sentences:

· sb. + *be done* + direct object;

· sth. + *be done* + *to* / *for* sb.

有些动词带双宾语：间接宾语（接收人）和直接宾语（事物），可以转换出两种被动句：

· 人 + *be done* + 直接宾语;

· 物 + *be done* + *to* / *for* 人.

When verbs have object complements, the original object becomes the passive subject and the complement remains. For bare infinitive complements, we must add *to* in passive voice.

动词带有宾语补足语时，原来的宾语变为被动句主语，宾补保留。不带 *to* 的不定式作宾补，改为被动语态时必须加上 *to*。

Here are passive voice structures for all tenses:

以下为各时态被动结构：

Simple Present 一般现在	am/is/are done	Simple Past 一般过去	was/were done
Simple Future 一般将来	will be done	Present Continuous 现在进行	am/is/are being done
Past Continuous 过去进行	was/were being done	Future Continuous 将来进行	will be being done
Present Perfect 现在完成	have/has been done	Past Perfect 过去完成	had been done
Future Perfect 将来完成	will have been done	Modal Verbs 情态动词	modal verb be done
Infinitives 不定式	to be done

Yuri Gagarin: The First Human in Space

Yuri Alekseevich Gagarin was a Soviet cosmonaut, whose historic space-flight opened a new chapter for human space exploration. He was born on March 9, 1934, into a simple farming family in the village of Klushino, western Soviet Union. His childhood was affected by war. After World War II, he received technical training and developed a strong interest in flying. He joined a local flying club, completed aviation school, and became a skilled fighter pilot in the Soviet Air Force.

In 1960, Gagarin was selected from thousands of candidates for the top-secret Soviet space programme. After months of strict physical and psychological training, he was chosen as the main pilot for the Vostok 1 mission. On April 12, 1961, the spacecraft lifted off. Gagarin's famous cry "Let's go!" was broadcast as he headed toward outer space.

During the 108-minute journey, he completed one full orbit around Earth. Experiencing weightlessness, he observed our blue planet and kept flight records. The spacecraft re-entered the atmosphere safely, and Gagarin landed by parachute on a farm field in southern Russia. He had become the very first human being ever to travel into space.

The news shocked the whole world. Gagarin was awarded the title "Hero of the Soviet Union", the nation's highest honour. He travelled widely across many countries, sharing his space experience and calling for peace among nations. Sadly, his brilliant life ended early. On March 27, 1968, he died in a jet-fighter training accident at the age of 34.

Up to today, April 12 is celebrated as Yuri's Night worldwide to mark human space travel. Gagarin's courage and vision continue to inspire scientists, astronauts and young dreamers. His flight proved that human beings could reach beyond Earth and explore the unknown universe.

LGPL3 Free as in Freedom

UNIT 7

Feel the Rhythm

A Dialogues & Passages

Conversation 1

Teng Fei: Hey, guys! Have you heard the news?

Debbie: No. What?

Teng Fei: The Chinese Dragon band is going to perform at our New Year School Concert!

Debbie: Oh, great!

Jack: I love their music!

Clarice: Me too! I like the fact that they mix rock, pop, and traditional Chinese music to make a new style.

Debbie: Yes, it's amazing to hear the erhu and pipa being played together with the keyboard and electric guitar.

Jack: Yeah, I like musicians who are creative.

Clarice: So do I! And the lead singer, Bob Wu, has a voice that I could listen to all day!

Teng Fei: Do you think they'll play "Horse Racing"?

Debbie: They should! It's a piece which everyone loves!

Jack: Oh, I just remembered!

Clarice: What?

Jack: I've got a T-shirt which has the band's name on the back!

Clarice: Cool! You should wear it to the concert!

Conversation 2

Clarice: That was a great concert! Which performance did you like the best, Jack?

Jack: I thought “Horse Racing” was especially good. It really gave me the feeling of a horse race.

Debbie: Me too! I love music which is energetic! Their use of the keyboard and erhu made me imagine horses running down a track.

Clarice: Yes, but for me, I really like music which is full of joy and celebration, such as “Dance of

LGPL Free as in Freedom

the Golden Snake".

Teng Fei: The use of the erhu, pipa, and drums was exciting, but I prefer music that touches me—that's why I liked "Butterfly Lovers" more. The music tells a sad and romantic story.

Jack: Yeah, and it's interesting that the performers used both Chinese and Western instruments. I've never heard the erhu played together with the violin.

Teng Fei: I also liked "Voices of Spring". I never realised that you could dance to it!

Passage 1

The present that changed my life was the guitar my father bought me for my eighth birthday. I spent the next several months learning to play the guitar. I often sat next to my father while he showed me how to play a song. Then I went to my room and practised until my fingers hurt. I had a lot of trouble at first. But gradually, I became good at playing the guitar.

Some of my schoolmates invited me to join their band. At first, I was too shy to play in front of people. Then I realised that I enjoyed music more when I shared it with others. We had great fun playing music, and I made good friends with those in the band. Nowadays, our band is getting more and more popular. We often take part in performances both inside and outside our school.

Although I have become busier this year, I still love playing the guitar and manage to find time for it. Music makes me happy when I am feeling sad, and it relaxes me when I am stressed. It will always be part of my life.

Passage 2

Chopin: A Great Inspiration

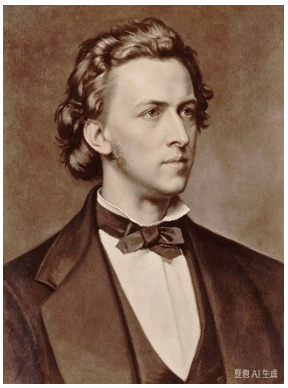

When the great composer Robert Schumann first heard a work which was written by young Chopin, he said, "Hats off, gentlemen! A genius!"

Frédéric Chopin (1810~1849) is considered one of the greatest musicians in history. During his short lifetime, he was celebrated as one of the world's greatest pianists—even though he only gave around 30 concerts! He was also a gifted composer who left behind more than 200 musical works.

Chopin was born in a village in Poland. He didn't attend music school until he was 16, but soon outdid his teachers. His parents sent him to Vienna in 1829 to widen his musical experience. By

LGPL3 Free as in Freedom

1832, he had made his way to Paris, the city that he would call home for the rest of his life.

Chopin was not only a great pianist, but also a respected piano teacher. He often told his students, “Put all your soul into it! Play the way you feel!” This is advice that is still followed by musicians today.

Polish folk music was a kind of music that some people looked down on at the time—it was seen as too simple and common. But it became an important characteristic of Chopin’s music. His use of Polish folk music caused people to see it as a valuable art form.

His music also helped build a nation which was divided up by other countries. By using Polish folk music, Chopin seemed to be saying to the world, “We are our own country with our own culture! We are our own people!” Chopin’s music encouraged his people and helped them keep going through years of difficulty. Today, the Polish people proudly think of Poland as the country of Chopin.

When Chopin died from ill health at 39, thousands of people travelled from faraway countries to attend his funeral. Today, people around the world still listen to his moving and often sad music. It is studied in music schools, played by pianists, heard in films and on TV, and loved by listeners young and old.

Passage 3

The Beauty of Chinese Music

Last night, one of my Chinese friends took me to a traditional Chinese music concert. I have always wanted to see traditional Chinese music performed live. The most common Chinese instruments I recognised were the *erhu, pipa, guzheng*, and *dizi*. The concert was a superb performance by Chinese artists, attended by both the elderly and the young. As a foreign audience member, I felt the legacy and continuation of traditional Chinese music in China, and I deeply felt the charm of traditional Chinese music.

The first song that was performed was a familiar tune, *"Molihua"* ("Jasmine Flower"). It was one of the first Chinese folk songs to become popular outside of China. The romantic song, played in a simple five-note scale that is characteristic of Chinese music, expressed the love for natural beauty. It was adapted into the Italian opera *Turandot* by Puccini. It was also played during the

2008 Beijing Olympic Games, the opening ceremony of the 2010 Shanghai Expo, and the opening ceremony of the Youth Olympics in Nanjing in 2014. No wonder it sounded so familiar!

My favourite performance was the *erhu* solo of *"Erquan Yingyue"*. The piece has a poetic name, which means "Moon Reflected on Second Spring". The gifted performer was so expressive that I almost cried along with it as I listened. The piece is considered one of the masterpieces of Chinese string music and the most famous piece by Chinese musician Abing. Its sad beauty reminded me of the hardships in Abing's life, but under the sadness, I sensed the musician's optimism and deep love for life.

The concert ended with *"Chunjie Xiqu"* (the "Spring Festival Overture"), the first movement of the *Spring Festival Suite* by Li Huanzhi. Composed in the 1950s, the piece was based on the folk music of northern Shaanxi. It depicts the Spring Festival celebrated in this region in China during the Chinese People's War of Resistance against Japanese Aggression. The piece had a lively beginning, and then slowed down to a soothing tune. As the melody played, I felt as though I was around the crowd celebrating the Spring Festival in Shaanxi back then, sharing the people's uplifting spirit and their hopes for a bright future.

Read, Discuss and Think

1. The cloth **washes** well.
2. This kind of pen **writes** smoothly.
3. The door **opens** easily.
4. The book **sells** well.
5. The meat **cooks** quickly.
6. The house needs repairing. ⇔ The house needs to be repaired.

KS Active Form with Passive Meaning 主动表被动

Some intransitive verbs, including *wash, sell, write, open, close, read, cook, burn, cut, lock,* etc., use the active form but carry a passive meaning. They describe the object's properties or characteristics, such as quality, function, or performance. These words CANNOT be used with "by + agent". If we talk about a specific completed action, we need ordinary passive voice. For example, "*The clothes were washed yesterday*".

一部分不及物动词，包括但不限于：*wash, sell, write, open, close, read, cook, burn, cut, lock* 等，使用主动形式，却表达被动含义。这类句子用来描述事物本身的属性、特质、性能，不能搭配 *by* 引出动作执行者。如果描述某次具体发生的动作，则使用普通被动语态，例如："*The clothes were washed yesterday*"。

After certain verbs or phrases like *need, want,* etc., the v-*ing* is used in active form but carries passive meaning. It means "need to be done".

一部分动词，包括但不限于：*need, want* 等，其后可加动名词，以主动形式表达被动含义。

You and Me

You and me, from one world.
We are family.
Travel dream, a thousand miles,
Meeting in Beijing.
Come together.
Put your hand in mine
You and me, from one world.
We are family

L'Internationale

Arise, ye starvelings from your slumber,
Arise, ye criminals of want.
For reason in revolt now thunders,
and at last ends the age of "can't"!
Now away with all superstitions,
Servile masses, arise, arise!
We'll change forthwith the old traditions,
And spurn the dust to win the prize!
‖: *Then, comrades, come rally,*
And the last fight let us face.
The Internationale
Unites the human race. :‖
No saviour from on high delivers;
No trust have we in prince or peer.
Our own right hand the chains must shiver,
Chains of hatred, of greed and fear.
E'er the thieves will disgorge their booty,
And to all give a happier lot.
Each at his forge must do their duty,
And strike the iron while it's hot.
‖: *Then, comrades, come rally,*
And the last fight let us face.
The Internationale
Unites the human race. :‖

Debout, les damnés de la terre
Debout, les forçats de la faim
La raison tonne en son cratère
C'est l'éruption de la fin
Du passé faisons table rase
Foule esclave, debout, debout
Le monde va changer de base
Nous ne sommes rien, soyons tout
‖: *C'est la lutte finale*
Groupons-nous, et demain
L'Internationale
Sera le genre humain. :‖
Il n'est pas de sauveurs suprêmes
Ni Dieu, ni César, ni tribun
Producteurs, sauvons-nous nous-mêmes
Décrétons le salut commun
Pour que le voleur rende gorge
Pour tirer l'esprit du cachot
Soufflons nous-mêmes notre forge
Battons le fer quand il est chaud.
‖: *C'est la lutte finale*
Groupons-nous, et demain
L'Internationale

UNIT 8 More Than a Game

A Dialogues & Passages

Conversation 1

Meimei: Hello, everyone! Finally, here comes the exciting 4×100 m relay! I'm Song Meimei.

Adam: This is Adam. Welcome to the 4×100 m relay.

Meimei: Look. The runners are at the starting line. The race is about to start.

Adam: They're off! Wang Yaming for Class 1 takes the lead.

Meimei: He passes the baton to Peter. Peter keeps the lead. Now for the handoff to Han Lin.

Adam: Oh, no! Peter drops the baton! Han Lin picks it up! But the other runners run past him.

Meimei: Li Lei for Class 5 takes the lead now. Wait a minute! Han Lin is making up ground on Li Lei.

Adam: Here comes the final handoff. Li Lei passes the baton to Xie Tao. Han Lin passes the baton to Teng Fei.

Meimei: And here are Teng Fei and Xie Tao side by side! They cross the line together!

Adam: But who won?

Meimei: The judges are reviewing the video to decide who the winner is. Let's wait for their final decision! Oh! The winner is Teng Fei!

Adam: Congratulations to Class 1!

Conversation 2

Ella: The Winter Olympics start next month. What event would you like to watch?

Teng Fei: Ski jumping is at the top of my list.

Ella: Same here!

Teng Fei: Really? I just love seeing the athletes fly through the air!

Ella: I agree. It's not easy to do what they do.

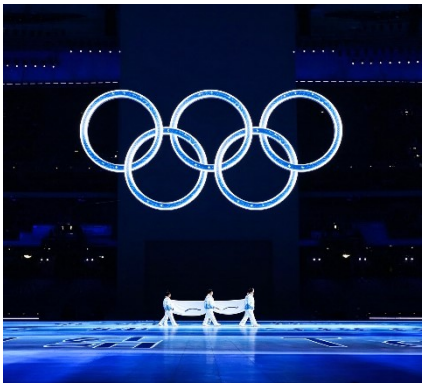

Teng Fei: My parents and I also enjoy watching figure skating.

I'm always amazed by their strength and technique.

Ella: Like you, my family watch sports together, especially speed skating. It's truly amazing.

What about the Summer Games? Do you have a favourite event?

Teng Fei: Oh yes! I especially like the men's swimming.

Ella: You must be a good swimmer.

Teng Fei: Not really, but I love watching it anyway. For me, the swimming events are so exciting because swimmers often win by just 0.01 seconds. My family also watch team sports together, like women's volleyball. That's my mum's favourite.

Ella: Cool! Oh, don't forget to watch the opening ceremony.

Teng Fei: Yeah. That's always exciting!

Passage 1

An Olympic Swimmer Who Nearly Drowned

You may have never heard of my favourite athlete, Eric Moussambani, the first Olympic swimmer from Equatorial Guinea.

Eric swam in the 100 metre freestyle at the 2000 Sydney Olympics. However, he had just begun swimming only eight months before the Games! The only swimming pool for him was a hotel pool about 13 metres long, and even then he could only use it for an hour every morning. In fact, the first time he ever saw an Olympic sized 50 metre swimming pool was at the Olympics.

During his race, he swam well for the first 50 metres, but the last 15 metres of the race were especially difficult for him. In fact, it looked like he was going to drown! But he tried hard and finished the race, winning loud cheers from the crowd.

Though Eric Moussambani is not an Olympic medal winner, he is still my favourite athlete. He never gave up no matter how hard it was. With hard work and practice, Eric later became quite fast at the 100 metres. His time for the 100 metre event improved from 1 minute 52 seconds, his

LGPL3
Free as in Freedom

Olympic record, to under 57 seconds! He later became the coach of the national swimming team for Equatorial Guinea, and he is a true example of the Olympic spirit.

Passage 2

Good morning, everyone!

Today, I'd like to talk about my favourite sports event. Actually, when I used the word "event", I meant two events: the 2008 Summer Olympics and the 2022 Winter Olympics. They were held in Beijing—the first city ever to host both the Summer and the Winter Olympics.

The most recent was the 2022 Winter Olympics. A total of nearly 2,900 athletes attended and competed in 109 events in seven Olympic winter sports. There were many exciting moments. Nearly the whole world watched the fantastic figure skating and ski jumping competitions. I watched the freestyle skiing, and like everyone else, I fell in love with those brave and talented athletes. I also became a huge fan of the mascot, Bing Dwen Dwen.

And we shall not forget the amazing achievements in the 2008 Summer Olympics. I watched in wonder as Usain Bolt smiled his way across the finish line in the 100 metres, setting a new world record. Then I watched the drama of the shooting event. Du Li won her second Olympic gold medal, after the first one in 2004. Both were dramatic come-from-behind victories.

Hosting two Olympics brought challenges but also opportunities to Beijing. Both Games showed China's success in its reform and opening up on the world stage. China's great achievements have gained worldwide attention. In both events, many volunteers and citizens helped out. They worked with pride to make sure that people from around the world had a pleasant stay.

Events like the Olympic Games build bridges between countries and form friendships between people. The purpose of the Olympics is to build relationships between people, to celebrate the Olympic spirit, and to bring people together for peace and harmony. This is shown in both the motto of the 2008 Olympics, "One World, One Dream", and the motto of the 2022 Olympics, "Together for a Shared Future". These mottos touch my heart quite deeply, as I'm sure they touch yours.

Thank you for listening!

LGPL3 Free as in Freedom

Passage 3

The Paralympics: Strength and Spirit

Every two years, millions of people from around the world turn on their TVs to watch the Summer or Winter Olympic Games. However, did you know that a few weeks later, the same city hosts another major sports event—the Paralympic Games?

The Paralympics is an international sports event for athletes with physical disabilities. The original idea came from a doctor named Ludwig Guttmann in England shortly after World War II. Guttmann was interested in improving the lives of soldiers dependent on wheelchairs. He therefore decided to arrange a sports competition between a small group of patients on the same day as the opening of the 1948 Olympic Games. This small event slowly grew, and in 1960 it became known as the first Paralympic Games. It was decided that from then on the Paralympics would be held in the same year and country as the Olympic Games. Nowadays, the Paralympic Games take place in the same cities as the Olympics and use the same venues a short time later.

In the beginning, the Paralympics were open only to people in wheelchairs. However, in 1976, athletes with visual and other physical disabilities were included. Generally, athletes at the Paralympics only compete against others with the same kind of disability.

Like the Olympics, the Paralympics have also produced many great heroes and champions, including Natalia Partyka, who was born without a right hand. She has competed in table tennis in the Olympics, and also in the Paralympics, where she has won gold medals. Some Paralympians are blind and need a guide to help them in racing events. For example, Chinese Paralympian Liu Cuiqing has won four gold medals with her guide, Xu Donglin. She won gold in the 400 metres and 4 × 100 m relay in 2016, and the 400 metres and 200 metres in 2021.

The Paralympics' goal has always been to help those with disabilities to improve their physical health and bring them joy and purpose. The motto for the Olympic movement is "Faster, Higher, Stronger—Together". The Paralympic Games follow this motto, showing the amazing strength and spirit of athletes with physical disabilities.

D Expanding Horizons

Living Legends of Sports

As a player, Lang Ping brought honour and glory to her country. As a coach, she led the China women's volleyball team to medals at world championships and the Olympics. As a person, Lang Ping is loved by fans at home and abroad. When the Chinese team was preparing for the 2015 World Cup, her determination was tested. The team that Lang Ping had built was falling apart. One of the best players had been injured, and the team captain had to leave because of heart problems. Losing two important players was a big challenge, but Lang Ping did not lose heart. She had faced difficulties before, and she knew that her young players could win if they worked together as a team. Two weeks later, they were world champions! Then in 2016, Lang Ping led her volleyball team to Olympic gold in Brazil.

When Michael Jordan's feet left the ground, time seemed to stand still. The player who became known as "Air Jordan" changed basketball with his graceful moves and jumps. Jordan's skills were impressive, but the mental strength that he showed made him unique. In the final seconds of a game, Jordan always seemed to find a way to win. Jordan says that the secret to his success is learning from his failures. "I can accept failure; everyone fails at something. But I can't accept not trying." Losing games taught him to practise harder and never give up. In life, Jordan has learnt to share his success with others. The Boys and Girls Club which he started in Chicago has been helping young people since 1996.

When Yelena Isinbayeva gripped her pole and prepared to lift herself into the air, all eyes were fixed on her. Known as the queen of women's pole vault, she rewrote the sport's history with her strength and courage. Her techniques were brilliant, yet her strong will made her extraordinary. In critical competitions, she always tried to clear new heights. She says the secret to success is challenging her limits. "I can accept failing to jump over a height. But I can never accept giving up before I try." Failed attempts taught her to adjust and keep moving forward. She also inspires young athletes through sports projects to chase their track and field dreams.

UNIT 9 Let's Celebrate!

A Dialogues & Passages

Conversation 1

Yuan Meng: What do you think of the race, Frank and Helen?

Frank: It is so exciting! I love the sounds of the drums. Thanks for bringing us here, Yuan Meng.

Helen: Yes, I agree. Can you tell us more about the festival?

Yuan Meng: The Dragon Boat Festival is a traditional festival in China.
It's on the fifth day of the fifth month of the Chinese lunar calendar.

Frank: I heard it is even celebrated in other countries like Malaysia and Singapore.

Yuan Meng: That's true.

Helen: It reminds me of my visit to Italy. I saw a boat race there.

Yuan Meng: Yes, I think there are many boat races around the world,
but this one is special because of the story behind it.

Helen: What is the story?

Yuan Meng: Long ago, a great poet called Qu Yuan died in the river. The locals rowed boats and threw rice into the river to keep fish away from his body. Today, people race boats and make zongzi in memory of him.

Conversation 2

Teng Fei: What's on your calendar next month, Clarice?

Clarice: I'm going to Thailand to experience their
New Year celebrations.

Teng Fei: Wow, that must be fun, although I believe it's quite hot there.

Clarice: Yes, that's true, but there's a water festival there from the 13th to 15th of April.

Teng Fei: That must cool people down. Do you know you can also do the same in China?

Clarice: Really? Where?

Teng Fei: Well, there's also a water festival in Yunnan Province.

Clarice: How exciting! I wonder if the two water festivals are similar.

LGPL Free as in Freedom

Teng Fei: Yes, it's actually the Dai people's New Year celebration in mid-April as well.

People go into the streets and throw water at each other.

Clarice: That sounds interesting. But why do they do that?

Teng Fei: Well, according to their culture, the water washes away bad things.

Then they'll have good luck in the new year.

Clarice: I hope I'll get some good luck in Thailand!

Passage 1

Dear Binbin,

How are you? I miss China, but I am happy to be back home in Brazil. It is February, so I am enjoying the Carnival in my hometown, Rio de Janeiro. This is my favourite festival. It is also one of the biggest carnivals in the world. During this time, we have hundreds of street parties all over the city.

The most important celebrations take place in the streets along the beach. You can see parades everywhere for days. A very traditional dance is the samba. Many dance schools in Rio prepare their own shows for the Carnival. We have a special place for these shows. It is like a huge stadium where the school groups can perform. Here you will hear people playing beautiful music and see them dancing in fantastic costumes.

This festival is so important for Brazil. It brings everyone together to celebrate the colourful culture and way of life here.

I hope that you'll come and experience this with me one day.

Best wishes,

Jason

Passage 2

New Year Celebrations around the World

New Year is a wonderful time when family and friends come together to remember the old year and welcome the new one. People all around the world celebrate New Year with music, special food, and fireworks. In fact, they even do it at different times. Let's look at how this festival is

LGPL3
Free as in Freedom

celebrated in some parts of the world.

In the UK, many people gather in London on 31 December to see the famous Big Ben clock tower and count down to midnight, while millions watch it on TV. At midnight they sing Auld Lang Syne, a Scottish song, to remember friends and family. In the US, people have similar customs. A famous tradition is the dropping of a big ball in New York. Huge crowds gather in Times Square to watch this. When the ball reaches the bottom at exactly midnight, they all wish each other “Happy New Year!”

Chinese people consider the Spring Festival the most important. It is a time for everyone to say goodbye to the old year and give a warm welcome to the new. There are lots of customs, such as sweeping out dust from houses, putting up couplets, setting off fireworks, and watching lion dances and dragon dances. One very important custom is for people to return home and reunite with their families. They especially enjoy the big family dinner on the eve of the Spring Festival. This is when grandparents, parents, and children come together to eat delicious food and express best wishes for the whole family.

In Egypt, people celebrate Sham El Nessim in April to mark the beginning of spring. The name of the festival means “smelling the breeze”. At this time, the weather becomes brighter, and the flowers and trees begin to show their colours. People paint eggs which are symbols of new beginnings. They also go out to enjoy picnics, dance, sing, and watch plays at the theatre.

Although New Year celebrations are different throughout the world, something remains the same. In every country, it is a special time for people to spend time with their family and friends and show hope for the coming year.

Passage 3

The 24 Solar Terms

More than 2,000 years ago, the ancient Chinese developed the 24 solar terms—a unique "calendar" to understand nature. They divided the year into 24 periods, each lasting 15 or 16 days. These terms were a guide for farmers—informing them of when to carry out certain farming activities. Many traditional Chinese festivals and folk customs are also related to the 24 solar terms.

Spring

The year begins with Start of Spring. Among the many traditions for welcoming spring is a popular custom, "biting the spring", where people eat spring pancakes or spring rolls. As the temperature rises and rainfall increases, nature slowly awakens. Farmers prepare their fields so that they can plant their crops during Grain Rain, the last term of the season.

Summer

Start of Summer marks the transition from spring to summer. Summer is a busy time for farmers. During the Grain in Ear ("Ear" here means the top part of a grain plant, such as wheat, that contains the seeds.) period, which is the third solar term of summer, farmers in northern China harvest winter wheat, while farmers in southern China are busy planting summer rice. It is no wonder why this term sounds like "busy with planting" (mangzhong) in Chinese!

Autumn

Start of Autumn marks the coming of a harvesting season. There is a saying that goes, "If it rains on the day of Start of Autumn, a good harvest is expected." By the day of Autumn Equinox, the middle point of autumn, the weather in most areas becomes cool and leaves change in colour from green to orange and yellow. The Mid-Autumn Festival, a festival full of poetry and imagination, is celebrated around this time. Families and friends gather to admire the full moon and eat mooncakes.

Winter

Winter is a time for farmers to store their harvests and rest. After Start of Winter, the weather gradually changes from cool to cold. A traditional custom on the day of Start of Winter is to eat dumplings. The delicious and nutritious dumplings embody a warm wish for a cosy winter. Major Cold is the final term of the year and the coldest time of the year. As the new year draws near, families start to prepare for the Spring Festival.

Today, the 24 solar terms still play an important role in life. They remind us of how nature changes through the year and reflect the Chinese wisdom of living in harmony with nature.

How the World Celebrates Mid-Autumn Festival

Better known by its far more imaginative name of the Mooncake Festival, for millions of Chinese across Asia, the Mid-Autumn Festival is a big deal, second only to Chinese Lunar New Year celebrations. The festival is held on the fifteenth day of the eighth month in the Chinese lunar calendar, during a full moon, which is in September or early October in Gregorian calendar.

Throughout Asia especially Eastern Asia, households celebrate this festival in a variety of ways, with the releasing of sky lanterns, dragon dancing and the age old tradition of eating mooncakes. Mid-Autumn Festival is a time for families to gather and spend time together, like a western Christmas or Thanksgiving Day. Each nation and region outside China also has its own peculiar customs for moon worship. Let's take a look.

In China, Mid-Autumn Festival is one of the most important holidays. Farmers celebrate the end of the summer harvest season on this day. Traditionally, on Mid-Autumn Day, Chinese family members and friends will get together to admire the bright mid-autumn harvest moon, and eat mooncakes and pomeloes together. Accompanying the celebration, there are additional cultural or regional customs, such as floating sky lanterns, guessing riddles on lanterns, enjoy fragrants wine or watch tides in seaside regions.

In South Korea, falling on the same date as the Chinese Mid-Autumn Festival, Chuseok is a major harvest festival. For outsiders, it's sometimes hard to grasp the significance of this three-day event, as it is deeply family-oriented. If you were well in with a kind Korean family, this would be a great opportunity for an in-depth look at Confucianism in action.

In Singapore, although not a designated public holiday for Mid-Autumn Festival, the city celebrates in typically over-the-top fashion which is as ever, well stage-managed. All the action takes place in Chinatown with an official opening ceremony and sea of shimmering lanterns. There are numerous lion dancers against the sound of loud firecrackers and Mandarin pop songs. This being Singapore, there is a huge moon-inspired street market with the usual mix of traditional Chinese souvenirs and fabulous street food.

UNIT 10 A Look into the Past

A Dialogues & Passages

Conversation 1

Fu Xing: Hey, Peter! Check out this article about the ancient Egypt exhibition in Beijing.

Peter: Hi, Fu Xing! That sounds interesting! You know, I actually visited Egypt last summer.

Fu Xing: Wow! How was it?

Peter: The Great Pyramid was amazing. It might be one of the largest single buildings on the planet.

Fu Xing: Did you see the Gold Mask of King Tut?

Peter: Yes, I saw it in a museum in Cairo. I also saw some gold shoes and rings that belonged to King Tut.

Fu Xing: I read that some people believe he was killed by enemies because there were broken bones in his head.

Peter: Yes. However, researchers now think that may be wrong. A CT scan showed that he had a wound on his leg. Later, a DNA test showed that he had a serious illness. So they believe those could be the causes of his death.

Fu Xing: Well, that must be true since scientific tests can be trusted more.

Conversation 2

Guide: Follow me, please. Does anybody know what this is?

Rose: That could be a mummy?

Guide: Well, it's similar to a mummy. It is actually called Xin Zhui, also known as Lady Dai. She died in 163 BCE. In 1972, archaeologists found her body in almost perfect condition. She still had her own hair and a soft body.

Adam: Wow! How did the ancient people keep her body in such good condition?

LGPL3 Free as in Freedom

Guide: That's still a mystery. But it's believed she must have lived a wealthy life. Archaeologists found her body along with thousands of ancient items. Look at this piece of clothing. Can you guess what it might be made of?

Adam: It looks so thin. It can't be very heavy. Could it be made of cotton or silk?

Guide: It is made of silk. It's only about 49 grams, or 0.1 pounds. And it can be folded into a small matchbox.

Rose: Amazing! Ancient Chinese people must have been really good at making silk clothing.

Guide: That's correct!

Passage 1

Hello, everyone! I'd like to present to you a historical site from the Mayan civilisation. Maybe you've heard about the Egyptian pyramids, but the Mayan people also built hundreds of pyramids throughout Central America from about 1,000 BCE to 1,500 CE. Here you can see the most famous example—the Pyramid of Kukulkan.

For the Mayans, Kukulkan was a snake god. Twice a year, when the day and night are in balance, the setting sun creates a strange shadow on one side of the pyramid. This shadow is in the shape of a snake crawling down the steps. Interestingly, the building has a total of 365 steps. The Mayans could have built this to show the number of days in the solar year.

There's also another interesting fact about the pyramid. Inside there are two more pyramids. The Mayans must have built each pyramid on top of the other over a long period of time. Isn't that amazing?

So, from the Pyramid of Kukulkan, we can learn a lot about the ancient Mayan civilisation.

That's all! Thank you!

Passage 2

A Discovery That Shocked the World

Of the many archaeological sites and museums throughout China, the Sanxingdui Museum in

LGPL3 Free as in Freedom

Guanghan, Sichuan Province, attracts millions of visitors around the world every year.

Once visitors walk through the gates of the museum, they will be surprised by the amazing collection of cultural artefacts from the Bronze Age. The ancient people of Sanxingdui lived by the Yangtze River more than 3,000 years ago. However, people were not aware of them until the 20th century when Sanxingdui was discovered. Thousands of gold, bronze, ivory, and jade objects were found underground.

The first big discoveries were in two pits in 1986. More than 1,000 artefacts were found and many were repaired, including the marvellous famous bronze tree, the huge mask, the bronze man, and the gold stick. More recently, in 2019, six more pits were found and dug in the area. More amazing artefacts have been found in them, including some 3,000 year old gold masks and bronze zun. By using modern technologies, researchers even found some remains of silk items. All the artefacts show that people from that era must have been highly skilled in metalwork as well as carving. They might also have developed the skill of making silk.

The discovery of Sanxingdui shocked the world, and it has been called one of the world's greatest archaeological finds of the 20th century. It was especially mysterious as there was no writing found with it, and the art style seemed very different and unique. Historians think Sanxingdui gives important evidence for the study of the development of Chinese civilisation.

Passage 3

Into the Unknown

A lost city under the sea in the Atlantic Ocean. Gardens up in the air in an ancient city in the Middle East. These are just two famous examples of historical mysteries that have fascinated people for thousands of years. Why are people so interested in such things? Well, humans are naturally curious. We like to use our imagination. Even when reading, many people love to read about places and times that might not be possible to visit in real life. Also, we like to find explanations for the things we do not fully understand. Sometimes we may just want answers to the simple questions of where and why.

Is the lost city of Atlantis real?

Around 360 BCE, the ancient Greek writer, Plato, told the story of Atlantis, an island in the Atlantic Ocean. The founders of the island were half god and half human, and they became very rich and powerful. However, when they became too greedy and wicked, the gods made a terrible night of fire and earthquakes, and the island sank into the sea.

Although it is probably just a legend, later European writers believed it could be true. There were many arguments as archaeologists tried to identify the actual location of the island. "Pick a spot on the map, and someone has said that Atlantis was there," said a professor at the New York State Museum. Some thought it could be in the Mediterranean Sea, while others said it might be off the coast of Spain. Yet another idea was that Atlantis could be Antarctica. But was the island real? We may never know.

Where were the Hanging Gardens of Babylon?

Another famous mystery involves a wonderful collection of gardens in the ancient city of Babylon, south of today's Baghdad, the capital of Iraq. The Hanging Gardens of Babylon is one of the seven wonders of the ancient world. Many writers described these gardens as beautiful plants and flowers hanging from the walls of the city. However, unlike the other wonders, scientists today argue about whether these gardens ever existed at all. A researcher from Oxford University claimed that there were such gardens, but they could have been in a completely different city, Nineveh, which was near the modern city of Mosul, in northern Iraq. Unfortunately, both sites suffered damage from wars, so it may be difficult for archaeologists ever to solve this mystery.

LGPL3

B Key Structures

Read, Discuss and Think

1. This is the city **where I live**. This is the city **(that/which) I visit.**
2. I remember the day **when we met**. I remember the day **(that/which) we spent together**.
3. Tell me the reason **why you're late**. The reason **which he gave me** is not true.
4. The girl **whose mother is our class teacher** is my girlfriend.

KS Relative Clauses with *where, when, why, whose*

定语从句（*where/when/why/whose*）

A relative clause (attributive clause) modifies a noun or pronoun called the antecedent.

定语从句用来修饰名词或代词，这个被修饰的词叫先行词。

Where, when, why are relative adverbs. They function as adverbials in the relative clause and retain their own meanings. When the antecedent refers to a place and the relative clause has no missing subject or object, we use *where* to introduce the relative clause. When the antecedent refers to a time and the relative clause has no missing subject or object, we use *when* to introduce the relative clause. When the antecedent refers to a reason and the relative clause has no missing subject or object, we use *why* to introduce the relative clause.

Where、*when* 和 *why* 是关系副词，在定语从句中作状语，保留本身词义。当先行词指地点且从句中不缺主语和宾语时，定语从句的引导词用 *where*；当先行词指时间且从句中不缺主语和宾语时，定语从句的引导词用 *when*；当先行词指原因且从句中不缺主语和宾语时，定语从句的引导词用 *why*。

Whose is a relative pronoun showing possession, meaning "whose" or "of which". It modifies a noun. When there is a possessive relationship between the antecedent and the subject of the relative clause, and the clause has no missing subject or object, we use whose to introduce the relative clause.

Whose 是关系代词。当先行词和定语从句主语之间有从属关系且从句不缺主语和宾语时，定语从句引导词用 *whose*。

When relative clauses are introduced by *where*, *when*, *why* or *whose*, the relative words cannot be omitted in most cases. However, if the antecedent is *the day*, *the moment* (referring to time) or *the reason*, the relative word can be replaced by *that* and can be omitted.

定语从句由 *where*、*when*、*why*、*whose* 引导时，通常情况下引导词不可省略，但当先行词是 *the day*、*the moment*（指时间）、*the reason* 时，引导词可替代成 *that* 并可被省略。

D Expanding Horizons

The Chinese Writing System: Connecting the Past and the Present

China is widely known for its ancient civilisation which has continued all the way through into modern times, despite the many ups and downs in its history. There are many reasons why this has been possible, but one of the main factors has been the Chinese writing system.

At the beginning, written Chinese was a picture-based language. It dates back several thousand years to the use of *longgu*—animal bones and shells on which symbols were carved by ancient Chinese people. Some of the ancient symbols can still be seen in today's *hanzi*.

By the Shang Dynasty (around 1600–1046 BCE), these symbols had become a well-developed writing system. Over the years, the system developed into different forms, as it was a time when people were divided geographically, leading to many varieties of dialects and characters. This, however, changed under Emperor Qinshihuang of the Qin Dynasty (221–207 BCE).

Emperor Qinshihuang united the seven major states into one unified country where the Chinese writing system began to develop in one direction. That writing system was of great importance in uniting the Chinese people and culture. Even today, no matter where Chinese people live or what dialect they speak, they can all still communicate in writing.

Written Chinese has also become an important means by which China's present is connected with its past. People in modern times can read the classic works which were written by Chinese in ancient times. The high regard for the Chinese writing system can be seen in the development of Chinese characters as an art form, known as Chinese calligraphy, which has become an important part of Chinese culture.

Today, the Chinese writing system is still an important part of Chinese culture. As China plays a greater role in global affairs, an increasing number of international students are beginning to appreciate China's culture and history through this amazing language.

UNIT 11 A Taste of Art

A Dialogues & Passages

Conversation 1

Yaming: Look at these ancient Chinese paintings.

Ella: I like this one! It's so different from Western paintings.

Emma: It's really long!

Yaming: Yes. Traditional Chinese painters preferred to show several scenes from right to left. This painting tells you a story by bringing you on a journey.

Ella: Traditional Western paintings often tell a story too, but they usually show only one'scene.

Emma: Also, they often show things like in a photograph.

Yaming: That's right! Here, the Chinese painter let his brush dance across the painting. Instead of painting everything exactly, he tried to show us his idea of nature.

Ella: Hmm ... There are a lot of empty areas with no paint at all.

Emma: In many Western paintings, It's the opposite. Every part of the background is covered in paint. And they often have dark shadows.

Yaming: But Chinese painters do have one thing in common with Western painters ... They use their art to express their feelings and understanding of the world!

Conversation 2

Joe: Wow, that was a great trip! What did you enjoy most during our trip to the Louvre?

Betty: I loved the pyramid in front of the museum!

Dave: Yes, the Louvre Pyramid by I.M. Pei! It's new and modern but it fits perfectly with the old classical buildings around it. I just love how the light makes the glass shine!

Betty: Then there was the Venus de Milo. She's such a beauty!

Dave: Yeah! The ancient sculptor really understood the human body.

Joe: What about the Mona Lisa?

LGPL Free as in Freedom

Betty: I really like that painting. She looks alive! Her eyes seem so gentle, and her skin seems so soft.

Joe: It took years for Dr. Vinci to finish the Mona Lisa. He put his heart and soul into it.

Betty: That must be why the painting looks like it could talk to us.

Dave: And of course, there's her smile! I'd really love to know why she was smiling!

Joe: Nobody knows for sure. But it's the mystery that makes the art so beautiful!

Passage 1

My favourite artist is Vincent van Gogh. He was born in the Netherlands in 1853. It was not until he was 27 that he decided to become a painter and began studying art. Van Gogh went to stay with his brother in Paris in 1886. There, he experienced the bright colours of famous French painters. This was when van Gogh developed his famous style—using short brushstrokes of thick paint and bright colours. After moving to the countryside two years later, he painted his most famous works, including *Sunflowers*. With a painting like *The Starry Night*, we can see colours, imagination, and energy in van Gogh's work. He was able to show the passion and feelings inside himself like few other people before or since. Sadly, he died in 1890.

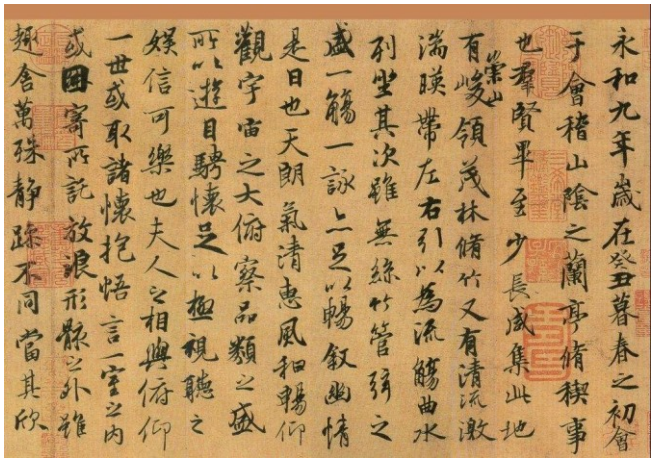

I like van Gogh because he showed passion and energy in his life. I like him also because he loved nature and painted it in all its beauty.

Passage 2

Experiencing Chinese Calligraphy

Last weekend, a friend and I went to visit an art museum. We found many works of traditional Chinese calligraphy on show. It was my first time to visit such an exhibition, and I was really excited. Although I don't know much about Chinese calligraphy, I can see it everywhere in China. It is in advertisements, on posters, and on buildings. Many homes have it on their walls or front doors. You may even come across people writing calligraphy with water and a big brush on the ground in a park. I came to learn that calligraphy is viewed by Chinese people as one of the highest forms of art.

LGPL3 Free as in Freedom

In the museum, my Chinese friend told me an interesting story about calligraphy. Wang Xizhi (303-361) was one of the best calligraphers in history. He once attended a party of the Orchid Pavilion. Every guest was expected to write a poem during the party. At the end of the party, Wang wrote the introduction to the poems. The next day, Wang looked at his calligraphy—the Lanting Xu (Introduction to the poems written at the Orchid Pavilion)—and realised that it was his best calligraphy ever. He then tried to recreate the exact style of calligraphy, but he found it impossible to do so. When he was at the party, he was very happy and relaxed. This made his calligraphy especially lively. People later said that the calligraphy in the Lanting Xu looked like a Chinese dragon at play.

It is a pity that the original version of the Lanting Xu has been lost, but it was copied and studied by many calligraphers. In fact, calligraphy students today still copy the Lanting Xu, along with other famous works in history. Doing so not only helps them to improve their own calligraphy but also develops their artistic awareness.

While I still don't understand enough about Chinese calligraphy, I began to see the beauty in the calligraphy apart from the meaning of the words. As an art form, it is meant to inspire, to make us think, and to show our understanding of beauty.

Passage 3

Rodin and Balzac

One of the most famous modern sculptors is Auguste Rodin (1840-1917). Rodin was born in Paris, and he trained to be a sculptor from an early age. For many years, he had to make a living by decorating buildings.

Things changed for Rodin in 1875 when he had a chance to visit Italy. He found new inspiration when he saw the works of Michelangelo. His breakthrough work—*The Age of Bronze*—was completed that same year. It was so realistic that people thought he had just made a cast of a human body. When Rodin proved that it was truly his work, he became the talk of the town.

LGPL Free as in Freedom

While The *Thinker* is Rodin's most famous sculpture, his sculpture of Balzac is also influential. Honoré de Balzac (1799-1850) was one of France's most beloved writers. After his death, it was decided in 1891 that a statue should be created in his honour. Rodin was supposed to complete the statue in 18 months, but in the end it took seven years! To make things worse, at first it was rejected by the public because people did not think it looked like Balzac at all. Rodin's reply was that the statue was not supposed to look like Balzac's body—it was supposed to show Balzac's character and spirit. Upset about the rejection, Rodin took the sculpture home and refused to show it again. It was not until 1939 that the first bronze version of the sculpture was created and put on display.

Today, the sculpture, *Balzac*, is celebrated as one of the first truly modern sculptures and as one of the greatest sculptures ever made. The importance of this work and others is that Rodin was able to break away from traditional Greek and Roman style sculptures and create something entirely new. Rodin's sculptures are full of emotion and life, and they speak to modern audiences in a way that traditional sculptures do not. This is why Rodin is still celebrated and studied by artists today.

5. We talked about the teachers and schools **that we had visited**.
6. There is nothing **that can stop him**.

KS Relative Clauses with *that* only 定语从句（只能用 *that* 引导）

A relative clause (attributive clause) modifies a noun or pronoun called the antecedent.

定语从句用来修饰名词或代词，这个被修饰的词叫先行词。

In some restrictive relative clauses, only *that* can be used as the relative pronoun; *which*/*who* cannot be used here:

· The antecedent is an indefinite pronoun: *all, everything, nothing, something, anything, none*;

· The antecedent is modified by superlative adjectives;

· The antecedent is modified by ordinal numbers;

· The antecedent is modified by *the only*, *the very*, *the last*;

· The antecedent includes both people and things;

· After the interrogative pronouns *who* and *which* to avoid repetition.

在部分限制性定语从句中，关系代词只能用 *that*，不能使用 *which* 或 *who/whom*：

· 先行词是指物的不定代词，如：*all, everything, nothing, something, anything, none*；

· 先行词被形容词最高级修饰；

· 先行词被序数词修饰；

· 先行词被 *the only*, *the very*, *the last* 修饰；

· 先行词既指人又指物；

· 主句包含 *who* 或 *which* 以避免歧义。

C Vocabulary & Phrases

affair /əˈfeə(r)/ n. 公共事务；事件；关系

apart /əˈpɑːt/ adv. 除外；分开

UNIT 12 Reduce, Reuse, Recycle

A Dialogues & Passages

Conversation 1

Manager: Hello, everyone! Welcome to our waste disposal centre. I'm the manager here, and I'm going to take you on a tour around our centre. Please, follow me.

Fu Xing: Wow, I never realised that there are so many kinds of rubbish! I wonder where it comes from.

Manager: Most of the rubbish here comes from people's homes. The rest is from schools, hospitals and businesses.

Fu Xing: What happens to the rubbish here?

Manager: First, we organise it into different groups as soon as it arrives. The things that can be recycled, such as paper, glass, metal, and plastic bottles, will be taken to recycling centres. They can be used to make new products.

Adam: What about things that can't be recycled?

Manager: Some of it, such as medical waste and wood, can be burnt and processed to provide energy. The food waste can be treated and then added to soil to help plants grow.

Sam: That sounds good for the environment!

Manager: It is, but we must remember that reducing our waste is still the best solution for our environment.

Conversation 2

Host: The problem of rubbish is becoming more and more serious nowadays. Dr. Wu, what can we do about it?

Dr. Wu: Have you heard of the three Rs: reduce, reuse, and recycle?

Host: Recycle! Everyone knows about that! We can recycle materials like glass, paper, plastic, and metal.

Dr. Wu: Yes, but while recycling is good, not everything can be recycled. The first thing we need to do is reduce our waste.

LGPL Free as in Freedom

Host: Could you tell us what we should do?

Dr. Wu: Well, you can buy products with less packaging. Also, buy only the food you need to reduce food waste.

Host: And please tell us about the last “R”.

Dr. Wu: Sure. Reuse means using things again and again. Many things we use daily, like glass bottles and plastic bags, can be reused. We can also donate our clothes, books, and toys to people who need them.

Host: I think we can solve the problem if everyone follows the three Rs!

Passage 1

We are deeply worried about the poor condition of our city’s beach. The beach is no longer a nice place to spend time at because it is covered in waste. Broken glass stops us from walking on the soft sand. Birds and sea animals sometimes get trapped by plastic bags, or even worse, eat them as food. Part of the rubbish is washed up onto the beach by the sea. However, most of the litter is left by people who go there to enjoy themselves.

We need to take action before the problem gets worse. Teams from our school pick up rubbish on the beach every Saturday, but that is not enough. We hope that the city government will encourage more people to join our teams. Also, we need to set up more rubbish bins and make sure that people cooperate by throwing their litter in the bins before they leave. People should also try to bring their own bottles and bags so that there is less rubbish. I believe that we can solve this problem if we work together.

Passage 2

The Yangtze River and Its Guardians

Every morning, 53 year old Chen Ming walks 15 kilometres along the Yangtze River. As he does so, he often stops to talk to the people picnicking beside the water or to watch the birds catch fish in the river’s clear water. While one might think that he is just out for exercise, he is actually working. Mr Chen is a “Guardian of the River”. His job is to walk along the river and make sure that no one is fishing in it or polluting it.

Mr Chen was not a “Guardian of the River” before. He grew up on the banks of the Yangtze

LGPL3 Free as in Freedom

River and used to be a fisherman, like his father. Back then, parts of the river were smelly and yellow because of the waste from factories and homes. Fishermen were also catching too many fish. As a result, the number of fish and plants in the river was dropping quickly.

The government took action to deal with the problem before it was too late. New waste centres were built to clean the wastewater before it went into the river. Laws were made to stop new factories from being built near the river. Boats were sent out to clean up the rubbish. Finally, fishing was banned in the Yangtze River for 10 years from 2020. Mr Chen and other fishermen were given new jobs as guardians to protect the river.

At first, Mr Chen was not used to working on the riverbank. Now he feels happy because he has a good job and a steady income. He is also glad to see that the Yangtze River has returned to what it used to be like when he was a child, with a lot of fish swimming in the clear water and beautiful birds enjoying their life on the bank. He is proud of his job. “Look there! That’s my wife,” Mr Chen said to the reporter. “She has joined a river clean up team, and we work together to protect our mother river. We must protect it for our future generations.”

Passage 3

The Problem with Plastic

Plastic is one of the most useful materials in the world. It provides many benefits to our lives because it is cheap and convenient. For example, two or three hundred years ago, clothes were quite expensive, so many people only had one or two sets of clothes to wear. Now, with plastics like nylon and polyester, clothes have become much cheaper. Plastic can also be used to replace other things that are rare or valuable. For example, things like piano keys, which were once made from ivory, are now usually made from plastic. This saved the lives of many elephants.

However, while plastic has many benefits, it also causes lots of problems. Some plastic is so strong that it takes more than 400 years to break down before returning safely to the environment. When plastic is put in a landfill, the harmful materials inside can get into the soil and water underground. When plastic rubbish is burnt, it fills the air with harmful gas. Another problem is that plastic rubbish is often thrown on the ground. Rain washes that rubbish into the rivers. From there, it is swept out to the sea. Sea animals can get caught in it or hurt by it. Worse yet, sometimes fish eat the plastic as food, and it gets into their bodies. When the fish get to our dining table, the plastic would get into humans' bodies and harm our health.

LGPL Free as in Freedom

What can we do about this problem? The best solution, for now, is to use less plastic. For example, bring your own reusable bag when shopping. Buy products, such as clothing and toothbrushes, made of natural materials. Avoid buying products with plastic packaging. Say no to single-use plastic items—plastic spoons and forks, plastic food containers and straws, etc.

While plastic is convenient and useful, in the end, most of it will last longer on our planet than we will. Let us not leave this problem to our future generations when we can deal with it now.

B Key Structures

Read, Discuss and Think

1. Tom **is** a student.
2. The students **are** hard-working.
3. The news **is** surprising.
4. The family **is** a big one.
5. The family **are** watching TV.
6. Neither you nor he **is** wrong.
7. There **is** a pen and two books on the desk.
8. The teacher together with his students **is** coming.

KS Subject-Verb Agreement 主谓一致

Subject-verb agreement requires that the predicate verb matches the subject in person and number. It follows three rules: grammatical concord, notional concord and the principle of proximity.

主谓一致要求谓语动词在人称和数上与主语保持一致。遵循三大原则：语法一致、意义一致、就近原则。

When some phrases including *together with, along with, as well as, besides, except, except for, but, rather than, including, in addition to,* etc., are added after the subject, do NOT change the number of the main subject. The predicate verb agrees with the subject before these phrases.

当这些词组，包括但不限于：*together with, along with, as well as, besides, except, except for, but, rather than, including, in addition to* 等，置于主语之后，它们不会改变主句主语的数，谓语动词和词组前面的主语保持一致。

When a compound indefinite pronoun like *someone, something, somebody, anyone, anything, anybody, no one, nothing, nobody, everyone, everything, everybody,* etc., serves as the subject, the predicate verb takes the singular form.

复合不定代词，如：*someone, something, somebody, anyone, anything, anybody, no one, nothing, nobody, everyone, everything, everybody* 等作主语，谓语动词用单数。

For quantifier structures, the choice of predicate verb usually depends on the noun after the preposition *of*. *A number of* takes a plural verb, while *the number of* takes a singular verb.

量词结构的主谓一致，谓语动词的选择通常由介词 *of* 后面的名词决定。*A number of* 谓语用复数，*the number of* 谓语用单数。

A collective noun, including *family, class, team, group, government, public, crowd, audience,*

LGPL Free as in Freedom

etc., refers to a group of people or things. It can take either a singular verb or a plural verb. Use the singular verb when the group is regarded as a single whole. Use the plural verb when referring to the individual members inside the group.

集合名词，包括但不限于：*family, class, team, group, government, public, crowd, audience* 等的主谓一致。集合名词指代一群人或事物。它后面的谓语动词既可用单数也可用复数：强调整体时，谓语动词用单数；强调群体里面的个体成员时，谓语动词用复数。

Poems about Environmental Protection

If I Were a Giant

Linda Middleton

If I were a great, ginormous giant,
Towering terrifically tall in watery depths,
I'd strain every ocean,
through my supersized sieve.
To capture every poisonous piece of plastic.
Squishing it into the biggest ball,
I'd boldly bat this lethal planet polluter
To orbit Earth like a mean menacing moon.
And I'd earnestly whisper,
'Humans, this is your last chance.'

If I were a giant strong and true,
I'd pull the smoke from skies of blue.
I'd mend the wounds on forest floor,
And open wide each creature's door.

But giants live inside our mind,
The real work waits for humankind.
So pick up litter, plant a seed,
Let Earth breathe freely, yes, indeed.

Proverbs about Environmental Protection

- Take care of the earth and it will take care of you.
- Nature does not hurry, yet everything is accomplished.
- Lucid waters and lush mountains are invaluable assets.
- We do not get the earth from our ancestors; we borrow it from our children.
- If you drain the lake to fish, you will surely get fish, but there will be none next year.

UNIT 13 I Remember Meeting All of You in Grade 7

A Dialogues & Passages

Conversation

Yaming: Peter, which teacher will you miss the most after you graduate?

Peter: I think it must be Mr. Guo.

Yaming: Our maths teacher?

Peter: Yes. I used to dislike maths, but he showed me that it could be both challenging and fun. Now, I really like solving maths problems. How about you, Yaming?

Yaming: Well, I really like many of our teachers. But I think I'll always remember our English teacher, Ms. Gao.

Peter: What will you remember about her?

Yaming: Well, when I first started junior high, I was usually silent in class. I was afraid that I couldn't pronounce some words correctly, but Ms. Gao was very patient and always encouraged me. Now, I'm quite confident and often speak up.

Peter: That's true. I can see how you've changed.

Yaming: She also showed us that English can be fun with interesting stories and plays.

Peter: I agree! What else will you miss about junior high? I'll miss the school trips and club activities.

Yaming: Yes, me too! Oh, I'll never forget my time here.

Peter: Neither will I!

Passage 1

Years have passed since I graduated from junior high, and I have forgotten many of the classes I took, but this one remains vivid in my memory, as if it were yesterday. It was on October 13th, 2025. Our class teacher, Mr. Oliver asked us to talk about what our favourite variety shows are. We chimed in with our picks: *Give Me Five*, *Crazy Maika*, *Produce X* 101, *Running Man*, and so on. After a lively discussion, he shared his answer: *Super Brain* Season 2, Episode 10, aired on March 13th, 2015.

LGPL Free as in Freedom

“What impressed me most was the detail-perception duel between Wang Yuheng and Haraguchi Akira called *The Mystery of the Fans*. They were given 2 hours to memorise how each of the 200 open fans matched the folded fans one-to-one. After that, the referee shuffled the folded fans and randomly picked 3. The challengers had to choose the 3 corresponding open fans from the 200 displayed.”

“That’s impossible!” Some students shouted, “I could never do that.”

“Me neither.” Oliver admitted, “So, when Wang simply said he didn’t need time to memorise them and did just sit quietly with his eyes closed while Haraguchi was carefully memorising details of those fans, everyone present, including Haraguchi, was shocked.”

“He must be crazy!” we exclaimed and wondered if Wang had succeeded.

“He did, and he won.” Oliver replied calmly, “In fact, he even spent less time.”

“But how?”

“In the post-match interview, Wang explained that each fan held far more details, making it unique.” Mr. Oliver took a sip of water and continued, “However, the host thought Wang disrespected Haraguchi sensei. And Wang’s response moved me deeply. He thanked them for scheduling this Sino‑Japanese duel on the thirteenth day of a month in Nanjing at first. Then he said, ‘To be honest, 200 fans are too few. Maybe 300,000 fans might be more fitting. I once saw a fan covered entirely in text, but when folded, it appeared blank.’”

The classroom fell silent, and all of us remained lost in thought until the bell rang.

Passage 2

I Remember

Looking back at these past three years
I remember many things
Trying to be on time for morning readings
Running when the lunch bell rings

I remember starting day one
The shyest in my whole class
Never speaking to anyone
And thinking I would not pass

I remember the excitement
Of the school sports day each year
The many long hours of training
Pride of overcoming fear

Then slowly I made some new friends
To remember forever
Helping each other with homework
Getting better together

LGPL3 Free as in Freedom

Preparing for art festivals
And making a great big mess
Having fun at New Year's parties
Wishing everyone the best

We have learned a different language
That is from a foreign land
English brings many challenges
We work hard to understand

And now it's time to graduate
We will leave our lovely school
I can't believe it's been three years
I'm trying to keep my cool

But it's difficult not to cry
I'll miss the school trees and flowers
And our kind and caring teachers
Wonderful memories of ours.

Passage 3

See It Through

Edgar Guest

When you're up against a trouble,
Meet it squarely, face to face;
Lift your chin and set your shoulders,
Plant your feet and take a brace,
When it's vain to try to dodge it,
Do the best that you can do;
You may fail, but you may conquer,
See it through!
Black may be the clouds about you
And your future may seem grim,
But don't let your nerve desert you;
Keep yourself in fighting trim.

If the worst is bound to happen,
Spite of all that you can do,
Running from it will not save you,
See it through!
Even hope may seem but futile,
When with troubles you're beset,
But remember you are facing
Just what other men have met.
You may fail, but fall still fighting;
Don't give up, whate'er you do;
Eyes front, head high to the finish.
See it through!

Passage 4

It's a Long Way

William Braithwaite

It's a long way the sea-winds blow
Over the sea-plains blue,

LGPL Free as in Freedom

But longer far has my heart to go

Before its dreams come true.

It's work we must, and love we must,

And do the best we may,

And take the hope of dreams in trust

To keep us day by day.

It's a long way the sea-winds blow

But somewhere lies a shore

Thus down the tide of Time shall flow

My dreams forevermore

‘

B Key Structures

Read, Discuss and Think

1. The patient's kind words finally make me feel warm inside.

2. The worried customer is now calm.

3. We listen carefully and keep the speaker feeling satisfied.

4. What I believe is that if we respect every customer who comes to us, we will find that good service builds trust.

KS1 Elements of Sentences 句子成分

A sentence is made up of different parts called sentence elements. The main elements are subject, predicate, object, predicative, attribute, adverbial and object complement.

句子由不同部分构成，主要成分有主语、谓语、宾语、表语、定语、状语、宾语补足语。

The subject of a sentence is the person, place, thing or idea the sentence talks about, usually performing the action or being described. It can be a noun, a pronoun, a noun phrase or a clause. Every complete sentence requires a subject, except in imperatives where the subject is implied.

句子的主语是句子所描述的人、地点、事物或概念，通常是动作的发出者或被描述的对象，可以由名词、代词、名词短语或名词性从句（主语从句）充当。除祈使句省略第二人称主语外，每个完整的句子都必须包含主语。

The predicate of a sentence is the action taken in a sentence, which generally includes the verb and all the words that add detail to the action or subject.

句子的谓语是句中所表达的动作，通常包含动词以及所有用来补充说明该动作或主语的词语。

The object of a sentence is the person, place, thing or idea that receives the action of a verb or follows a preposition. It can be a noun, a pronoun, a noun phrase or a clause.

句子的宾语是承受动词动作或跟在介词后的人、地点、事物或概念，可以由名词、代词、名词短语或名词性从句（宾语从句）充当。

The predicative comes after linking verbs. It describes or identifies the subject and can be a noun, adjective, prepositional phrase, or clause.

句子的表语位于系动词之后，用来描述或说明主语的身份、特征，可以由名词、形容词、介词短语或名词性从句（表语从句）充当。

The attribute of a sentence modifies or limits a noun or pronoun. It tells us which one, what kind, or how many. It may appear before or after the word it modifies.

LGPL Free as in Freedom

句子的定语修饰或限定名词、代词，用来说明名词 / 代词是哪一个、什么样的或者多少。它可以放在被修饰词的前面或者后面。

The adverbial of a sentence modifies a verb, adjective, adverb, or the whole sentence. It mainly shows time, place, manner, cause, condition, degree and so on.

句子的状语修饰动词、形容词、副词或者整个句子，主要表示时间、地点、方式、原因、条件、程度等。

The object complement of a sentence adds information about the object. It completes the meaning of the sentence and describes what the object is or becomes.

句子的宾语补足语用来补充有关宾语的信息，完善句子含义，描述宾语是什么或者变成什么。

KS2 Simple, Compound and Complex Sentences 简单、并列、复合句

A simple sentence contains only one independent clause. It has one subject and one predicate, though the subject or predicate may be compound.

简单句只包含一个独立分句。它有一套主语和谓语，不过主语或者谓语可以是并列结构。

A compound sentence consists of two or more independent clauses. These clauses are joined by coordinating conjunctions such as *and, but, or, so*.

并列句由两个或多个独立分句构成。这些分句由并列连词连接，例如 *and*、*but*、*or*、*so*。

A complex sentence is made up of one independent clause and one or more dependent clauses. Dependent clauses cannot stand alone as complete sentences.

复合句由一个主句和一个或多个从句构成。从句不能单独成为完整的句子。

Tips on Writing a Speech

Practical writing refers to practical-style texts with established conventional formats for conveying messages, conducting communication, keeping promises and following accepted customs. As one kind of practical writing, speeches are used to express opinions, share insights, advocate ideas or voice feelings on certain issues or events to specific or unspecific audiences. Here is the writing template for speeches.

✧ **Speech**

Ladies and gentlemen,

(问候)! My name is XXX. It's my great honour to give a speech about (主题).

(细节：论点及论据或观点、做法等)

In a word, we should (主题). Only in this way can we (主题).

Thank you from the bottom of my heart for giving me this chance to speak to you today!

UNIT 14 Open to New Beginnings

A Dialogues & Passages

Conversation

Ms Gao: Peter, Emma, and Ella, you're going back to your home countries soon, aren't you?

Peter: Yes, next month, in fact. I'm already starting to miss China.

Ms Gao: What did you enjoy the most about China?

Emma: Chinese food, of course!

Peter: I really enjoyed living here and learning about a different culture.

Ms Gao: I'm glad to hear that. So where do you see yourselves in the future?

Peter: I want to come back to China for university or work.

Ella: I plan to become a photographer or a reporter so I can meet different people and travel abroad!

Ms Gao: Wow, I hope all your dreams come true.

Ella & Peter: Thanks, Ms Gao.

Ms Gao: What about you, Emma?

Emma: Hmm, no plans yet. I'll decide after I graduate from high school.

Ms Gao: It's good to just focus on the present too! Make each day count.

Emma: Thanks for your advice, Ms Gao.

Ms Gao: Oh, it's so hard to say goodbye. I'll miss you all!

Passage 1

Dear teachers, parents, and fellow students,

Junior high school has been a great journey for me. I have learnt many things and gained not just knowledge and skills, but also friendship. The club activities have made my school life richer—many of you know how much I love our drama club! I will always treasure the unforgettable memories of my time here. And now, as hard as it is, it's time to say goodbye.

To our teachers, a big "Thank you!" for your hard work, guidance, patience, and support. To our

LGPL Free as in Freedom

parents and friends, I want to thank you from the bottom of my heart for your love and support. Together, we have gone through many ups and downs. All these experiences have helped us grow and prepared us for new challenges ahead.

Finally, to all my fellow graduating students, “Congratulations!” Just as our head teacher said at our graduation ceremony, let’s follow our passions and keep working hard. Though our dreams may seem far away, they are worth fighting for.

Good luck to all of us! I wish each of us every success in the future!

Passage 2

Good morning, students, teachers, and guests. Welcome to our junior high graduation ceremony! To begin with, I would like to congratulate all the new graduates. You have worked a long time for this moment. I remember meeting you when you first came here, full of energy and curiosity. Today, I’m full of pride as I see a room filled with talented youths, full of hope for the future.

As you set out on your life’s new journey, first, I would like to say, find your passion, and follow your dream! Find what you really love and put all your energy and effort into it. Turn your eyes to the stars and keep your feet on the ground.

Second, never give up! After graduation, everybody will be entering different schools. No matter where you go, you will face new challenges. See every challenge as an opportunity: an opportunity to grow, to learn, and to succeed. So be brave and deal with your challenges through hard work. Always bear in mind: Diligence leads to success in one’s life. Hard work will not fail you.

Third, learn to be thankful. While you have worked hard to finish junior high school, you did not work alone. Many others have lent hands to help you, and they have worked equally hard to get you to this moment. These people—your parents, teachers, and friends—have helped make you who you are today. Always be thankful for them. Cherish their love and care forever. Always remember who you are and where you came from.

Last but not least, the end of junior high is also the beginning of a new life. Give your very best and have no regrets. I wish you all success, and I hope we will meet again one day!

Passage 3

LGPL3
Free as in Freedom

Hi! My name is Adam and I'm a freshman at senior high school. Going from junior high school to senior high school is a really big challenge. The first week was a little confusing.

First, I had to think very carefully about which courses I wanted to take. The school adviser helped me choose the suitable ones: maths, English, chemistry, world history, and Chinese. I know that Chinese is a very difficult language, but I hope to be fluent when I graduate. My adviser suggested that I should sign up for advanced literature because I like English and I'm good at it.

I had to choose extra-curricular activities, too. I tried to join the school football team, but the coach told me that I didn't play well enough. Obviously, I was unhappy, but I won't quit. I'll find a way to improve on my own so that I can make the team next year. I joined a volunteer club instead. Every Wednesday, we work at a soup kitchen and hand out food to homeless people in the community.

I know I'll have to study harder as a senior high school student and get used to being responsible for a lot more. I'm a bit worried about keeping up with the other students in my advanced course, and it'll be quite difficult to get used to all the homework. Still, I'm happy to be here. Studying hard isn't always fun, but I'll be well prepared for university or whatever else comes in the future.

Passage 4

Auld Lang Syne

Should auld acquaintance be forgot,
and never brought to mind?
Should auld acquaintance be forgot,
and days of auld lang syne?
For auld lang syne, my dear,
for auld lang syne.

We'll take a cup of kindness yet,
for days of auld lang syne.
And surely you'll be your pint-stoup!
and surely I'll be mine!
We'll take a cup of kindness yet,
for days of auld lang syne.

(**INTERLUDE**)

We two have run about the braes,
and picked the gowans fine.
We've wandered many a weary foot,
since auld lang syne.
For auld lang syne, my dear,
for auld lang syne.
We'll take a cup of kindness yet,
for days of auld lang syne.
And there's a hand my trusty friend!
And give us a hand o'thine!

LGPL Free as in Freedom

We'll take a right good-will draught,

for auld lang syne.

For auld lang syne, my dear,

for auld lang syne.

We'll take a cup of kindness yet,

for days of auld lang syne.

B Key Structures

Read, Discuss and Think

1. The light is on. She **must be** in the office.
2. It **may** rain this afternoon.
3. She **could** still **be** waiting for us.
4. He **might be** at home.
5. That **can't be** true. It is impossible.

KS Modal Verbs for Possibilities (*must, could, may / might, can't*)

情态动词表推测（*must, could, may/might, can't*）

Modal verbs such as *must, may, might, could* and *can't* are used to show how certain we are about something. *Must* is used for strong positive guesses to express something is certainly true. *May*, *might*, and *could* are used for possible situations. *Can't* is used for strong negative guesses to express something is impossible.

Must、*may*、*might*、*could*、*can't* 等情态动词可用来表示对事情发生确定程度的推测，其中 *must* 用于肯定推测，表示事件为必然事件；*may*、*might*、*could* 表示事件有可能发生；*can't* 用于否定推测，表示事件为不可能事件。

C Vocabulary & Phrases

Word Formation 构词法

Word formation is the system of rules used to create new words by changing word classes, word forms or by combination. There are four main kinds of word formation: conversion, compounding, abbreviation and derivation.

构词法即通过改变词性、词形或组合等方式创造新单词的规则体系。英语构词法有 4 种主要形式：转化、合成、截短和派生。

1. Conversion involves the change of a word from one part of speech to another. It can be classified into verbalization and nominalization by the part of speech of the new word.

转化即实词按照一定的语言习惯灵活运用，改变原有词性，可大致分为动词化和名词化。

(a) Verbalization 动词化

i) When classified according to the meanings of the nouns, it can be roughly grouped into eight categories, including nature-related, body-part and place types. A few words shift their stress positions after the word-class conversion.

i) **名词活用为动词。**现代英语中此类现象特别常见，根据名词意思分类，可以大致分为自然类、身体部位类、场所类等 8 类，个别词汇在词性转换后改变重音位置。

Word	Noun	Verb	Word	Noun	Verb
weather	天气	（使）风化；平安度过	rain	雨	下雨
flood	洪水	（使）充满水；蜂拥而至	thunder	雷	打雷；怒吼 轰隆隆地移动
wind	风	**[规则]**（打腹部而）气急； （使）呼吸困难	cloud	云	（使）模糊； （使）难以理解
fog	雾	（使）困惑	wave	波	摇晃；挥舞； （头发）卷曲
storm	风暴	咆哮；突袭	shower	淋浴	淋浴；如阵雨般落下
dust	灰尘	除尘；在…上撒（粉末）	frost	霜	结霜；在…上撒（糖霜）
back	背	（使）后退；支持； 下赌注于	eye	眼	（饶有兴趣地）看；注视 ***eyeing; eyed***
face	脸	面对；正视；（使）正对 承认；在建筑表面覆盖	skin	皮肤	剥掉…的皮
arm	臂	为…提供武器装备；武装	hand	手	将…交给
finger	指	用手指触碰；抚摸 指证、告发（罪犯）	shoulder	肩	用肩扛；承受；承担
elbow	肘	用肘推；用肘挤开	mouth	嘴	用口型默示；对口型假唱 胡说；不真诚地说

LGPL3 Free as in Freedom

Word	Noun	Verb	Word	Noun	Verb
corner	角落	（车辆）转弯； 将（人或动物）逼入困境	house	房子	为…提供住处
room	空间	租住；（与某人）合租	market	商场	促销；推销；营销
school	学校	培养；训练； 教育（孩子）	bank	银行	把钱存入银行； （使）堆积
farm	农场	种植；养殖	park	停车场	停放（车辆）
tower	塔	高耸；矗立	station	站	安置；使（士兵）驻扎
father	父亲	成为…的父亲	mother	母亲	像母亲般照管；溺爱
husband	丈夫	节约地使用	author	作者	撰写；编写；发起
title	题目	给（文艺作品）起名	coach	教练	训练；培训；指导； 执教（体育队）
volunteer	志愿者	作志愿者；自愿做； 主动提供（信息）	pioneer	先锋	做先锋；当开拓者；倡导
spy	间谍	搜集情报；从事间谍活动	guest	客人	当特邀演员
bike bicycle	自行车	骑自行车	wheel	轮子	推动（有轮子的东西）； 盘旋
paste	糨糊	（用糨糊）粘贴； 粘贴（某一文本或文件）	ship	轮船	运输；运送
brush	刷子	轻触；（刷）净	knife	刀	用刀砍（或刺、戳）
fork	叉	（公路或河流）分岔； 叉运；叉起	saw	锯	锯开 sawed / sawn
hammer	锤	（用锤子）敲击；猛踢 彻底击败	file	文件 锉	把…归档；锉平； 锉光滑；发送（报道）
fox	狐狸	使迷惑；使上当	parrot	鹦鹉	鹦鹉学舌般地复述
dog	狗	跟随；跟踪；困扰	bug	虫子 漏洞	烦扰；使…担心
fish	鱼	钓；翻找；间接探听； 拐弯抹角地引出；搜寻	duck	鸭	（为避免被击中而）低头
time	时间	确定…的时间；为…计时	anger	愤怒	使生气；激怒
silence	沉默	使安静；使沉默； 压制批评	power	权力	为…提供动力；增加力量
email	E-mail	给（某人）发 E-mail	google	Google	用（搜索引擎）搜索
tweet	X 推文	在 X 上发布信息	skype	Skype	打（Skype）网络电话

ii) Based on the relationship between the meaning of the converted verb and the original adjective, it can be roughly divided into two types: causative use and intransitive use. Verbs converted through causative use are transitive verbs and must take an object, describing scenarios where a state is changed. Verbs converted through intransitive use are intransitive verbs and are mostly related to natural changes or the transformation of one's own state.

LGPL Free as in Freedom

ii) **形容词活用为动词。**根据活用为动词的词义与形容词词义的关系，可大致分为使动用法、自动用法等 2 类。其中，使动用法转化来的动词为及物动词，其后必须接宾语，用于描述改变状态的场景；自动用法转化来的动词为不及物动词，多与自然变化或自身状态转变有关。

Word	Noun	Verb	Word	Noun	Verb
better	更好的	（使）更好；改善	clean	干净的	（使）干净；打扫
clear	清白的 清澈的	（使）清白；证明无罪 （使）清晰；（使）清醒	empty	空的	（使）变空；腾空；倾倒
calm	冷静的	（使）冷静	lower	更少的	（使）下降；降低
further	深入的	（使）深入；（使）促进	dry	干燥的	变干
warm	温暖的	变暖和；升温	cool	凉爽的	变凉爽；降温

(b) Nominalization 名词化

Nominalization is chiefly the conversion of verbs into nouns. A few adjectives can also represent a type of person or object. Based on the semantic link between the converted noun and the original verb, there are three main types: nouns for the action itself, nouns for the product of the action, and nouns for the action's doer.

名词化主要为动词活用为名词，也有一些形容词可以代指一类人或事物。根据活用为名词的词义与动词词义的关系，可大致分为名词表示动作本身、名词为动作的产物、名词为动词的执行者等 3 类。

Word	Verb	Noun	Word	Verb	Noun
walk	走	散步	talk	交谈	谈话
run	跑	跑步；赛跑	swim	游泳	游泳
build	建造	建筑物（常用 *building*）	draw	画	绘画；素描
write	写	作品；手稿	find	找到	发现物
cut	剪/切	切口；删减/剪切片段	help	帮助	帮助（的事）
drink	喝	饮品；饮料；（一）杯	cook	烹饪	厨师

2. When we use compounding, we link together two or more bases to create a new word. Normally, the first item identifies a key feature of the second word. For example: green + house = greenhouse, blue + berry = blueberry, hard + ware = hardware, **sm**oke + f**og** = smog, **v**ideo + **log** = vlog, **work** + **a**lco**holic** = workaholic, five + starred = five-starred, black + board = black-board, etc.

合成即将两个或多个单词的全部或一部分紧缩为一个新词。通常，第一个成分用来说明第二个词的核心特征。例如：*green* (绿的) + *house* (房子) = *greenhouse* (温室), *blue* (蓝的) + *berry* (浆果) = *blueberry* (蓝莓),

LGPL v3 Free as in Freedom

hard (硬的) + *ware* (器皿) = *hardware* (硬件), ***sm****oke* (烟) + ***fog*** (雾) = *smog* (雾霾), ***v****ideo* (视频) + ***log*** (日志) = *vlog* (视频博客), ***work*** (工作) + ***a****lco****holic*** (酗酒者) = *workaholic* (工作狂), *five* + *starred* = *five-starred* (五颗星装饰的), *black* + *board* = *black-board* (黑板)等。

3. Abbreviation means forming a new word by cutting off part of one or more words. For example: tele**phone**→phone, aero**plane**→plane, **math**ematic**s**→maths, **exam**ination→exam, **app**lication →app, in**flu**enza→flu, re**frige**rator→fridge, **ad**vertisement→ad, **lab**ratory→lab, **sci**ence + **fi**ction → sci-fi, **wi**reless + **fi**delity → Wi-Fi, **A**cquired **I**mmune **D**eficiency **S**yndrome → AIDS /eɪdz/, **S**trapdown **I**nertial **N**avigation **S**ystem → SINS /sənz/, **W**ireless **L**ocal **A**rea **N**etwork → WLAN /wi:læn/, etc.

截短即截取一个或多个单词的一部分构成新词。例如：*tele****phone***→*phone* (电话), *aero****plane***→*plane* (飞机), ***math****ematic****s***→*maths* (数学), ***exam****ination*→*exam* (考试), ***app****lication*→*app* (应用程序), *in****flu****enza*→*flu* (流感), *re****frige****rator*→*fridge* (冰箱), ***ad****vertisement*→*ad* (广告), ***lab****ratory*→*lab* (实验室), ***sc****ience* + ***fi****ction*→*sci-fi* (科幻小说), ***wi****reless* + ***fi****delity*→*Wi-Fi* (无线保真技术), ***A****cquired* ***I****mmune* ***D****eficiency* ***S****yndrome*→*AIDS* (获得性免疫缺陷综合征), ***S****trapdown* ***I****nertial* ***N****avigation* ***S****ystem*→*SINS* (捷联惯性导航系统), ***W****ireless* ***L****ocal* ***A****rea* ***N****etwork*→*WLAN* (无线局域网络)等。

4. Derivation refers to the formation of new words by adding prefixes and suffixes before or after bases according to certain rules, which changes word classes and word meanings. The most common prefixes and suffixes are introduced in Unit 12, Book 2.

派生即根据一定规则，在若干词根前后添加若干前缀、后缀，构成新词，从而改变词性、改变词义。常见的前缀和后缀参见本系列教科书第二册第 12 单元。

LGPL Free as in Freedom

D Expanding Horizons

Distinguished guests, ladies and gentlemen,

I am delighted to be here and I'm particularly delighted to be here on this occasion.

We meet at a college noted for knowledge, in a city noted for progress, in a state noted for strength, and we stand in need of all three, for we meet in an hour of change and challenge, in a decade of hope and fear, in an age of both knowledge and ignorance.

The greater our knowledge increases, the greater our ignorance unfolds.

If you will, the 50,000 years of man's recorded history in a time span of but a half-century. Stated in these terms, we know very little about the first 40 years, except at the end of them advanced man had learned to use the skins of animals to cover them. Then about 10 years ago man emerged from his caves to construct other kinds of shelter. Only five years ago man learned to write and use a cart with wheels. The printing press came this year, and then less than two months ago the steam engine provided a new source of power and Newton explored the meaning of gravity. Last month electric lights and telephones and automobiles and airplanes became available. Only last week did we develop penicillin and television and nuclear power.

This is a breathtaking pace, and such a pace cannot help but create new ills as it dispels old, new ignorance, new problems, new dangers. Surely the opening vistas of space promise high costs and hardships, as well as high reward. (…) But why, some say, the Moon? Why choose this as our goal? And they may well ask why to climb the highest mountain? Why, 35 years ago, fly the Atlantic? Why does Rice play Texas?

We choose to go to the Moon. We choose to go to the Moon!

We choose to go to the Moon in this decade and do the other things, not because they are easy, but because they are hard; because that goal will serve to organise and measure the best of our energies and skills; because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win, and the others, too.

REVIEW 1

A Dialogues & Passages

Conversation

Reporter: Are you really going to retire, Miss Marsh?

Miss Marsh: I may. I can't make up my mind. I will have to ask my future husband. He won't let me make another film.

Reporter: Your future husband, Miss Marsh?

Miss Marsh: Yes. Let me introduce him to you. His name is Carlos. We're going to get married next week.

Kate: Look, Liz! Here's another report about Karen Marsh. Listen: 'Karen Marsh: The latest. At her London Hotel today Miss Marsh told reporters she might retire. She said she couldn't make up her mind. She said she would have to ask her future husband. She said her future husband would not let her make another film. Then she introduced us to Carlos and told us they would get married next week.'

Liz: That's sensational news, isn't it, Kate?

Kate: It certainly is. He'll be her sixth husband!

Passage 1

The Dead Return

A Festival for the Dead is held once a year in Japan. This festival is a cheerful occasion, for on this day, the dead are said to return to their homes and they are welcomed by the living. As they are expected to be hungry after their long journey, food is laid out for them. Specially-made lanterns are hung outside each house to help the dead to find their way. All night long, people dance and sing.

LGPL Free as in Freedom

In the early morning, the food that had been laid out for the dead is thrown into a river or into the sea as it is considered unlucky for anyone living to eat it. In towns that are near the sea, the tiny lanterns which had been hung in the streets the night before, are placed into the water when the festival is over. Thousands of lanterns slowly drift out to sea guiding the dead on their return journey to the other world. This is a moving spectacle, for crowds of people stand on the shore watching the lanterns drifting away until they can be seen no more.

Passage 2

The Nine-Coloured Deer

ACT 1

[On the riverbank, The nine-coloured deer and a raven come in. The deer drinks water from the river while the raven flies around it.]

Deer: Ah, the water is so clear!

Raven: Yes, and the world is so beautiful. I will never get tired of it.

[A drowning man is shouting for help]

Man: Help! Help!

Deer: Oh, there's someone in danger.

Raven: He's drowning! There!

Deer: *[Runs towards the man]* Don't be afraid. Hold on to my horns and climb on my back. I will carry you to the riverbank.

Man: *[Breathes heavily, walks three circles around the deer, and then bows to it.]* Thank you! You saved my life! I will do anything to pay you back. Please accept me as your humble servant.

Deer: You're most welcome. You don't need to serve me. If you do want to pay me back, I only make one request. Do not tell anybody about me or where I am.

Man: May I ask why?

Deer: Because of my fur and horns, many people have tried to hunt me before.

Man: That's horrible. You saved my life and I owe you. I won't let anyone know about you--I promise!

LGPL3 Free as in Freedom

Deer: You are a good man. I trust you. Goodbye!

Man: Thank you again, and goodbye!

[The deer and the raven exit the stage left. The man exits the stage right.]

ACT 2

Scene 1

[In the palace. The queen sleeps on the bed. Her maid stands nearby.]

Queen: *[Yawns and stretches.]* Oh, I just had a wonderful dream!

Maid: What was the dream about, my queen?

Queen: I dreamt of a beautiful deer! It had nine-coloured fur and snow-white horns! Oh, I want that deer's horns and fur so much!

Maid: Please forgive me if I ask this, my queen. Wouldn't it be better if we protect that beautiful deer and let it bless the country?

Queen: You are too young to know how valuable those horns and fur are. *[The king walks towards the queen's room.]* Someone is coming. It must be the king. Don't say anything.

Maid: Yes, my queen.

King: My queen, why don't you get up? Are you ill? *[Looks at the maid.]* Do you know what happened to the queen?

[The maid shakes her head.]

Queen: *[Coughs.]* Oh, I'm not feeling so well. I can't get out of bed. I might be dying!

King: Oh no! Don't say such terrible things, my dear. I must call the doctor.

Queen: No! Normal medicine won't work. I just had a dream where I saw a beautiful nine-coloured deer. If I can't have its horns and fur right away, I will surely die!

King: Don't worry. I am the king. I will get anything for you! I promise! Where is my servant?

Servant: At your service, my king.

King: Do you know anything about this nine-coloured deer?

Servant: No, my king.

King: Go find this deer right now! I will give a large reward to whoever finds it.

Servant: Yes, my king!

Scene 2

[The king's servant returns to the middle of the stage and opens a sheet of paper. A crowd of people gather around him. The man is sitting in the corner.]

Servant: Hear ye, hear ye! The queen is very ill. By the order of the king, we need the horns and

LGPL Free as in Freedom

fur of a nine-coloured deer to save the queen. Dead or alive, this deer must be found. The king will give a large reward to anyone who finds the deer.

Man: How large would that reward be?

Servant: It's beyond your imagination!

Man: *[Talks to himself]* I promised the deer I wouldn't tell anyone about it. After all, it saved my life, and I made a promise. But the king's reward will change my life. That deer is just an animal. How can it compare with the fortune I will get? *[Runs towards the king's servant.]* I know where the deer is!

Servant: You do?

Man: Yes! I give you my word of honour!

Servant: Follow me. I will take you to the king and the queen.

[The servant and the man leave the stage.]

Scene 3

[In the palace. The king and the queen sit. The guards and servants stand on the sides.]

King: Come forward, good man. Do you really know where that deer is? If you can get the deer's fur and horns, I will give you the large reward I promised.

Man: Yes, my king. I will lead you to find that deer. *[Scratches his face.]*

Queen: Oh, what happened to your face? Why is your face covered in horrible spots?

Man: Well, it's just because of the bad weather.

King: Are you sure? It looks quite bad. Do you need a doctor?

Man: Please don't worry about me. I think it will go away very soon. My king, you need the deer, but this deer is not ordinary. If you want to catch it, you should bring along your army.

King: No problem. *[Turns to the servant.]* Call up all the soldiers. We will move now!

Servant: Yes, my king!

King: *[Turns to the man]* And my good man, please show us the way.

Man: With pleasure.

ACT 3

[The man tiptoes across the stage, with the king, his servant, and soldiers following behind. The deer is sleeping on the opposite side of the stage.]

Man: *[Whispers.]* It won't be easy to catch that deer.

King: I'll do anything to save my wife. Don't worry. I brought the best soldiers.

Man: Shh! I saw it sleeping under a big tree. Follow me!

LGPL3 Free as in Freedom

King: Soldiers, keep close to his side.

Man: My king! The deer is over there! Follow me, but quietly, or we might wake it up.

King: Soldiers, get ready with your arrows and swords.

[The raven flies across and sees the king and his soldiers.]

Raven: *[To the deer.]* Wake up! Wake up! The king and his soldiers are here to catch you!

[The deer is fast asleep and doesn't hear the raven. The raven flies to the deer's side.]

Raven: Wake up! They are coming! Wake up!

[The deer wakes up, looks around, and walks towards the king and his soldiers. A soldier tries to attack the deer.]

King: Wait! *[Looks carefully at the deer.]* Don't kill the deer! It looks very special. It may have come from heaven.

Deer: Please don't kill me. The country owes me a favour.

King: Why is that so?

Deer: I saved one of your people. May I ask--who told you where I am?

King: It's him over there.

Deer: Oh! That is the man that I risked my life to save! He almost drowned in the river. It is I that carried him to the riverbank. I asked him to promise that he would not tell anyone about me, but now, he has failed to keep his promise.

King: I'm terribly sorry. This man didn't keep his promise and did a terrible thing to you who saved his life. And all I thought about was what my wife wanted. I am so ashamed of myself. Will you please forgive me?

Deer: You are a fine king. If you can just promise me one thing, I will forgive you.

King: I will keep my word. Please tell me what it is.

Deer: I hope your people can live with me in harmony from now on, instead of hunting me all the time.

King: You have my word.

Deer: It's so kind of you. It's time for me to leave. May you and your people live a good life. Goodbye! *[Leaves the stage.]*

King: Goodbye! And thank you for your blessing! *[Turns to the man.]* I should have never trusted you. You betrayed the deer who saved your life.

Man: I'm a sinner. Have mercy on me, my king!

King: I now order that no one should harm the nine-coloured deer. It will be protected and live a

LGPL Free as in Freedom

happy life unharmed by my people. And now, let's return to the palace!

Soldiers: Yes, my king!

LGPL v3
Free as in Freedom

B Key Structures

KS1 Tenses 时态

Tenses are a way of expressing the time frame of an action or event. They show whether the action has already happened, is happening now, or will happen in the future. In English, there are four primary tenses: **past**, **present**, **future**, and **past-future**. These tenses can be further divided into four aspects: **simple**, **continuous**, **perfect**, and **perfect continuous**.

时态是表达动作或事件时间范围的一种方式。它们表明动作是已经发生、正在发生，还是将要在未来发生。英语中有 4 种主要时间：**过去时**、**现在时**、**将来时**以及**过去将来时**。这些时态还可以进一步划分为 4 种体：**一般体**、**进行体**、**完成体**以及**完成进行体**。

	Simple	Continuous	Prefect	Prefect Continuous
Past	did	was / were doing	had done	had been doing
Present	do / does	am / is / are doing	have / has done	have / has been doing
Future	will do	will be doing	will have done	will have been doing
Past-Future	would do	would be doing	would have done	would have been doing

Here are some example sentences for all the 16 tenses:

以下为 16 种时态的例句：

1.1 We both **travelled** around Europe for about half a month last summer.

REVIEW 2

A Dialogues & Passages

Conversation

Julie: Are you doing the football pools, Brian?

Brian: Yes, I've nearly finished, Julie. I'm sure we'll win something this week.

Julie: You always say that, but we never win anything! What will you do if you win a lot of money?

Brian: If I win a lot of money, I'll buy you a mink coat.

Julie: I don't want a mink coat! I want to see the world.

Brian: All right. If we win a lot of money, we'll travel round the world and we'll stay at the best hotels. Then we'll return home and buy a big house in the country. We'll have a beautiful garden and…

Julie: But if we spend all that money, we'll be poor again. What'll we do then?

Brian: If we spend all the money, we'll try and win the football pools again.

Julie: It's a pleasant dream, but everything depends on "if"!

Passage 1

Never Too Old to Learn

I have just received a letter from my old school, informing me that my former headmaster, Mr. Stuart Page, will be retiring next week. Pupils of the school, old and new, will be sending him a present to mark the occasion. All those who have contributed towards the gift will sign their names in a large album which will be sent to the headmaster's home. We shall all remember Mr. Page for his patience and understanding and for the kindly encouragement he gave us when we went so unwillingly to school.

LGPL 3 Free as in Freedom

A great many former pupils will be attending a farewell dinner in his honour next Thursday. It is a curious coincidence that the day before his retirement, Mr. Page will have been teaching for a total of forty years. After he has retired, he will devote himself to gardening. For him, this will be an entirely new hobby. But this does not matter, for, as he has often remarked, one is never too old to learn.

Passage 2

The Necklace

ACT 1

Scene 1

[In a flat. Mathilde sits at the table and drinks soup. The maid, Agnes, stands by.]

Mathilde: Agnes, can you get the cheese for me? I need it for the soup.

Agnes: Of course, madame.

[Agnes goes to the cupboard and opens it.]

Agnes: Sorry, madame. The food cupboard is empty.

Mathilde: *[Sighs.]* Fine. I'll just drink this tasteless soup without cheese. But what kind of French household doesn't have cheese?

Agnes: I'm sorry, madame. The money for groceries this week has run out.

Mathilde: Oh, no! And look at these cheap spoons and bowls. A woman like me should have real silver plates and fine china. My life is so pitiful!

Agnes: Oh madame, don't say that! At least you have this cosy flat and enough food.

Mathilde: You don't understand. This is far from the life I want.

Scene 2

[Agnes leaves the flat. Loisel comes home carrying a briefcase. He sits at the table.]

Loisel: Hello, darling! What's for dinner?

Mathilde: It's the usual … French onion soup.

Loisel: Mm! It smells delicious!

Mathilde: It's supposed to have cheese on it, but we don't have any.

Loisel: It's fine! It tastes good enough even without cheese.

LGPL3 Free as in Freedom

Mathilde: Oh, I'm so tired of this kind of poor life.

Loisel: I'm sorry, Mathilde. I'm working as hard as I can as a clerk. We even have Agnes to help with the housework. I'm very happy with our life.

Mathilde: But I want to have fine things like Jeanne, my best friend. She went to the same school as me. I want to live in a nice house. For once, I'd like to go to a fancy ball and dance the night away like Jeanne does all the time!

Loisel: Oh, don't be sad, darling! I actually have some good news for you. Today, my boss, Mr Romponneau, gave me an invitation to the ball at the palace of the Ministry. All the important people will be there. Look! [*Takes out an envelope from his briefcase and hands it to Mathilde.*]

Mathilde: You must be kidding! That's the ball I read about in the newspaper. But I can't go. I have nothing to wear to a ball like that!

Loisel: What about that lovely gown you go to the theatre in?

Mathilde: It's too plain for a fancy ball at the palace! I'd be so embarrassed.

Loisel: You know … I've been saving up money for a hunting trip with my boss and co-workers. It's 400 francs. If it means so much to you, I'll give you the money to buy a beautiful gown for the ball.

Mathilde: But … I'll need jewellery too, and I don't have any. *[Buries her face in her hands and cries.]*

Loisel: Don't cry, darling. How about you ask your friend Jeanne to lend you some jewellery? You two are such good friends.

Mathilde: That's a good idea! Oh, thank you so much. You're such a wonderful husband. *[Pretends to ball-dance around the room.]* I'm going to the ball at the palace!

Scene 3

[At Jeanne's house. Jeanne is sitting in a nice armchair, drinking coffee, and eating biscuits. Mathilde enters the room shyly.]

Mathilde: Hello, Jeanne!

Jeanne: Oh, Mathilde! It's so lovely to see you! To what do I owe this surprise?

Mathilde: You know, you're my best friend.

Jeanne: Yes, we've known each other forever.

Mathilde: You see, Loisel and I got an invitation to the ball at the palace of the Ministry next week--the one held in honour of the foreign prince, with all the important people.

Jeanne: That's amazing! Everyone's talking about it. You're so lucky to have been invited.

LGPL Free as in Freedom

Mathilde: I'm so excited! I've even bought a new dress for it … but I don't have any jewellery to match it. I was wondering if I could borrow a necklace from you.

Jeanne: Of course! I have so many that I can hardly wear them all. [*Leaves the room and comes back with a large jewellery case.*] Help yourself to the one you like.

Mathilde: How generous you are! [*Opens the case and examines the jewellery one by one, gasps.*] They're all so beautiful. How about this one? But it looks expensive.

Jeanne: Don't worry, Mathilde. Take any one you like.

Mathilde: Oh darling, thank you! Thank you so much!

Jeanne: I bet you'll be the prettiest lady at the ball.

ACT 2

Scene 1

[At the ballroom in the palace. It is filled with people dressed in fine clothes and jewellery, talking, laughing, and dancing.]

Mathilde: Thank you so much for bringing me to this ball! Look at the prince and the minister, and their wives. They look gorgeous with their dresses and their shiny diamonds. I'm so happy!

Loisel: As long as you're happy, my dear. Come and meet my boss. Mr Romponneau, this is my wife, Mathilde.

Romponneau: *[Walks up to Mathilde and bows.]* Nice to meet you, madame. Your husband has been such a good help to me at work. And you look stunning tonight. May I have this dance?

Mathilde: It's so nice to meet you too, Mr Romponneau. It's my pleasure. See you later, Loisel.

Loisel: Take your time and enjoy yourself.

Lady: Look at that fair lady with her shiny diamond necklace. She looks gorgeous!

Minister: Do you recognise her?

Lady: No, I have never seen her at any ball. She must be a newcomer here, with a rich husband.

Minister: Let me invite her to the next dance. Then we'll know more.

[Mathilde dances with different people in turn. Loisel slowly falls asleep on a chair at the side of the room. After dancing for the whole night, Mathilde walks over to Loisel and wakes him up.]

Loisel: *[Yawns and stretches, then takes out his pocket watch and looks at it.]* Goodness, it's 4 a.m.!

Mathilde: It's been such a wonderful night! I've had so much fun! But sadly, it's time to go home.

Loisel: I'll get our coats and call us a cab.

Scene 2

LGPL3 Free as in Freedom

[Loisel and Mathilde enter their flat wearing plain coats over their gown and suit.]

Mathilde: I'm so tired! I didn't realise that it would be so difficult to find a cab at 4 a.m.!

Loisel: Thank goodness. We were able to find one down by the river.

Mathilde: But only after a 45-minute walk.

[Loisel takes off his coat and throws it on a chair. Mathilde begins to take off her coat and then cries in horror.]

Loisel: What's wrong, my dear?

Mathilde: The necklace! The necklace is gone!

Loisel: But you were still wearing it when we left the ball, weren't you?

Mathilde: I know! Quick, help me find it!

[Loisel looks through their coats. Mathilde empties her purse upside down on the table and looks through all the pockets.]

Mathilde: It's not there! It's not anywhere! Oh, what are we to do?

Loisel: *[Face brightens.]* I'll go out and look for it. It probably dropped on the street or somewhere. Or we could call the cab company. Maybe someone found it.

Mathilde: No one is going to return a valuable necklace like that! No, it's gone! Gone forever! What am I going to tell Jeanne? *[Cries.]*

Loisel: We can buy a replacement! She'll never know! Let's go and check all the jewellery shops.

Scene 3

[Mathilde and Loisel look through all the jewellery shops in the city until they find a similar necklace in the shop around the corner of a street.]

Mathilde: Oh, look at this. It looks exactly the same as Jeanne's. We're so lucky! Mister, how much is this necklace?

Shopkeeper: Madame, you have good taste. This necklace is 40,000 francs. It's the most expensive and beautiful one in our shop. It matches your beauty perfectly!

Loisel: 40,000 francs! My goodness! You must be kidding me!

Shopkeeper: Sir, look at all those diamonds. You will not regret spending this money when you see them shining on your beautiful wife's neck.

Loisel: But I can't afford that.

Shopkeeper: I can give you a discount. If you take it today, you will only have to pay 36,000 francs.

LGPL Free as in Freedom

Mathilde: We really need this necklace, but we don't have that much money. Is there any other way, Mister?

Shopkeeper: Well, since you want the necklace so much, I suggest you take a loan. You can pay a small sum of money every month until it's all paid up.

Loisel: *[Looks pale.]* I think that's the only way we can solve our problem now.

ACT 3

Scene 1

[In Loisel and Mathilde's new flat. It is much smaller and shabbier. Loisel comes back in looking tired and stressed.]

Loisel: Hi dear, I'm so hungry. I went to the trade company after work and did the accounting there for three hours without dinner.

Mathilde: I'm so sorry to hear that. Here's some soup. I made it with the last of our potatoes.

Loisel: After the day I've had, even potato soup is a feast for me. How was your day?

Mathilde: It was just as terrible as every day has been. I washed all the dishes and clothes with cold water and my bare hands. I climbed up and down the four floors with buckets of water. I had the usual quarrel with Mrs Butcher because she wouldn't sell me cheese on credit.

Loisel: Well, look on the bright side! Next week, the loan for the necklace will finally be paid off, and we'll be free. We'll have our lives back again!

Mathilde: But I'm no longer the beautiful young woman I once was. With all this hard work, I've aged 30 years!

Loisel: No, my dear. You're just too tired. Drink some hot soup and get some rest. Tomorrow will be another day.

Mathilde: Thank you, my darling, but I can't. I have to go and do the laundry for that rich family up the hill. I'll be back late tonight.

Loisel: I have got two more cases of work. I didn't finish them last Sunday, so I can't walk with you there. Sorry.

Mathilde: It doesn't matter. Give me your thick coat. It's getting cold outside.

[Mathilde finishes her soup and leaves.]

Scene 2

[One Sunday morning, Mathilde is walking slowly down a street. Jeanne walks towards her but does not recognise her.]

Mathilde: Hello, Jeanne.

LGPL3 Free as in Freedom

Jeanne: Oh, madame. Do I know you? You must have the wrong person.

Mathilde: It's me, Mathilde.

Jeanne: Mathilde? Is that you? [Stares closely.] It really is you! How long has it been since we met last time?

Mathilde: Ten years.

Jeanne: Ten years? But look at you! Your hair is totally grey, and your hands are so rough. You must have been through a lot. What happened?

Mathilde: It's all because of your necklace.

Jeanne: My necklace? I don't understand.

Mathilde: Remember that necklace I borrowed from you for the ball?

Jeanne: Yes …

Mathilde: Well, I spent a wonderful night with it. It turned out to be the happiest time in my life, but … I lost it!

Jeanne: That's not possible. You returned it a few days later. That was the last time we met, I think. I just saw it in my jewellery case the other day and thought about you.

Mathilde: No . No … That's a replacement. We took a loan of 40,000 francs and bought another necklace, so I could return it to you.

Jeanne: You bought a real diamond necklace?

Mathilde: Yes. And in order to pay off the loan for that necklace, we had to move to a small flat and couldn't have Agnes anymore.

Jeanne: Oh, my poor girl.

Mathilde: I've been doing housework for rich people for the past 10 years to earn extra money. Loisel has taken on two extra jobs and has been working all day, every day.

Jeanne: Oh, Mathilde. I'm really sorry to hear that.

Mathilde: But all the misery ends now. The loan was paid off yesterday, so I can have my time to myself and enjoy the sunshine in the street.

Jeanne: Mathilde, you should have told me earlier, and I could have saved you from all your misery.

Mathilde: What do you mean?

Jeanne: The necklace you lost was not a real diamond necklace. It was a fake. It couldn't have been worth more than 500 francs!

LGPL Free as in Freedom

B Key Structures

KS Dependent Clauses 从句

A dependent clause has a subject and a verb but does not express a complete thought. It depends on an independent clause. Dependent clauses work in different ways. In English, a clause can act like a noun, an adjective, or an adverb depending on how it's used.

从句是一类有主语和动词但不能表达完整意思的句子，它要依附于主句。从句的功能各有不同。在英语中，根据用法，从句可以充当名词、形容词或者副词。

The object clause is a type of noun clause and functions as object in a sentence. Object clauses fall into three basic types: Verb-Object clauses, Preposition-Object clauses, and Adjective-Object clauses. The Verb-Object clauses follow verbs that express thinking, believing, saying, or knowing; The Preposition-Object clauses follow prepositions to indicate the object of the prepositional phrase; The Adjective-Object clauses follow adjectives to complete their meaning. Object clauses generally keep their tenses in agreement with the main clause and must use declarative word order.

宾语从句是一类名词性从句，在句中充当宾语。宾语从句分为三类：动宾从句、介宾从句和形宾从句。动宾从句跟在表示思考、相信、言说或认知的动词之后；介宾从句跟在介词之后；形宾从句跟在形容词之后，用以补足形容词的含义。宾语从句的时态通常需要与主句的时态保持一致，必须使用陈述语序。

The adverbial clause is a group of words containing a subject and a verb that provides additional information about the main clause, such as when, where, why, how, to what extent, or under what conditions an action occurs. Unlike independent clauses, adverbial clauses cannot stand alone and rely on the main clause for context and meaning. They are introduced by subordinating conjunctions such as *when*, *if*, *because*, *although*, *while*, *after*, *before*, *until*, and *wherever*. Adverbial clauses can appear at the beginning, middle, or end of a sentence. When placed at the beginning, they are usually followed by a comma.

状语从句是一组包含主语和动词的词群，为主句提供补充信息，例如动作发生的时间、地点、原因、方式、程度或是条件。与独立分句不同，状语从句不能独立成句，需要依靠主句来获得语境和完整含义。状语从句由从属连词引导，常见的从属连词有 *when*、*if*、*because*、*although*、*while*、*after*、*before*、*until* 和 *wherever*。状语从句可以出现在句首、句中或句末。当置于句首时，其后通常要加逗号。

The adjective clause, also called relative clause, modifies a noun or pronoun, providing additional information, and usually begins with a word like *who*, *which*, *where*, *why*, *whose*, or *that*.

LGPL3 Free as in Freedom

形容词性从句，又称作定语从句，用来修饰名词或代词，提供补充信息，通常由 *who*、*which*、*where*、*why*、*whose*、*that* 等词引导。

Here are some example sentences for the dependent clauses discussed above:

以下为上述几类从句的例句：

1.1 I know **(that) he lives here**.

1.2 We wondered **whether he would come or not**.

1.3 Lily doesn't know **where Jack lives**.

1.4 Thomas Jefferson said **(that) all men are created equal**.

2.1.1 **When I lived in the countryside**, I used to carry some water for him.

2.1.2 Strike **while the iron is hot**.

2.1.3 **As she left the room** she remembered that book.

2.1.4 It will be a long time **before they come back**.

2.1.5 **After we had finished the work**, we went home.

2.1.6 Please wait **until I arrive**.

2.1.7 She has been living a hard life **since her husband died**.

2.1.8 I'll write you **as soon as I get there**.

2.1.9 I had **no sooner gone out than it began to rain**.

2.1.10 **By the time I got there**, the bus had already gone.

2.1.11 I don't mind **as long as it doesn't rain**.

2.2 A small town grew **where three roads met**.

2.3.1 **If he calls**, I'll say you're sleeping.

2.3.2 You can't learn English well **unless you work hard**.

2.3.3 **As long as it doesn't rain**, we can play.

2.3.4 **Provided we get good weather**, it will be a successful holiday.

2.3.5 There is any danger to employee **if and only if the right light comes on**.

2.4.1 The woolly shrank **because it was washed badly**.

2.4.2 **Since it is so hot**, let's go swimming.

2.4.3 We didn't know what to do **as we were just visiting there**.

2.4.4 We must start early, **for it will take two hours to drive to the airport**.

2.5.1 He looked **so sincere that no one doubted his story**.

2.5.2 She locked the door from the outside, **so that the kids couldn't get out**.

2.5.3 They are **such fine teachers that we all hold them in great respect**.

LGPL Free as in Freedom

2.6.1 **In order to catch up the first bus**, I got up at six this morning.

2.6.2 I'll run slowly **so that you can catch up with me**.

2.7 He writes **as if he is left handed**.

2.8 **As far as money is concerned**, you needn't worry.

2.9.1 **Although you may object**, I must give it a try.

2.9.2 **While the disease is not fatal**, it can be very dangerous.

2.9.3 We'll go to travel **even though the weather is bad**.

2.10 They work harder **than we do**.

3.1.1 I fall in love with a girl **who comes from the Mars**.

3.1.2 The doctor **(whom) you are looking for has been away from here for ten years**.

3.2.1 Their new house **which lies at the foot of the mountain has no electricity**.

3.2.2 Have you got the information **(which) you need for next week's speech**?

3.3 The place **where we're to have the speech contest** has not been decided yet.

3.4 We don't know the exact time **when the party will be held**.

3.5 He wrote a book **whose name I have completely forgotten**.
